5. We are dependent on our management team for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

7. Increases in capital commitments in our trading and other businesses may increase the potential for significant losses.

The trend in capital markets is towards larger and more frequent commitments of capital by financial brokerage house in many of their activities. We may be subject to increased risk as we commit greater amounts of capital to facilitate primarily client - driven business. We may enter into large transactions in which we commit our own capital as part of our trading business. The number and size of these large transactions may materially affect our results of operations in a given period. We may also incur significant losses from our trading activities due to market fluctuations and volatility from quarter to quarter. We maintain trading positions in equity markets to facilitate client trading activities and at times these positions can be large and concentrated in a single issuer. To the extent that we own assets, i.e., have long positions, a downturn in the value of those assets or in those markets could result in losses. Conversely, to the extent that we have sold assets we do not own, i.e., have short positions, an upturn in those markets could expose us to potentially unlimited losses as we attempt to cover our short positions by acquiring assets in a rising market.

8. Our professional reputation may be affected adversely and we may be liable to our clients and third parties if our services are not regarded as satisfactory.

Our Company is dependent to a large extent on our relationships with our clients and our reputation for integrity and the professional services to attract and retain the clients. As a result, if a client is not satisfied with our services, it may affect our business adversely.

9. Our clients deal in securities and any default by a client could result in substantial losses.

Our clients are required to deposit a minimum initial margin and then are required to pay the balance settlement amount by the pay-in date for the transaction undertaken by us on their behalf. If a client is unable to pay this balance amount before the pay-in date, we may be required to make the payment on behalf of the defaulting client, which may affect our profitability. In case of high market volatility or

adverse movements in share price, it is possible that clients may not honor their commitment, and any inability on our part to pay the margins to the stock exchanges may be detrimental to our business, reputation and profitability.

10. We are subject to uncertainties associated with the securities industry and to fluctuating revenues.

As a financial services company, we are subject to uncertainties that are common in the securities industry. These include the volatility of domestic and international financial markets, bond and stock markets, extensive governmental regulation, litigation, intense competition, substantial fluctuations in the volume and price level of securities, and dependence on the solvency of various third parties. As a result, our revenues and earnings may vary significantly from quarter to quarter and from year to year. In periods of low trading volume, profitability is impaired because certain expenses remain relatively fixed. We are much smaller and have much less capital than many competitors in the securities industry and our revenues are likely to decline in such circumstances. If we are unable to correspondingly reduce expenses, our profit margins would erode.

11. Material changes in the regulations that govern us could cause our business to suffer and the price of our Equity Shares to decline.

We are regulated by the Companies Act and our operational activities are subject to supervision and regulation by statutory and regulatory authorities including the SEBI, BSE, NSE, and other regulators. For more information please refer the chapter titled “Key Industrial Regulations and Policies” on page no. 67 of this Prospectus. In addition, we are subject to changes in Indian law, as well as to changes in regulation, government policies and accounting principles. Any material changes in the regulations that govern us could cause our business to suffer and the price of equity shares may decline.

12. Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditure and other factors.

We have not yet paid any dividends. For further details please refer to chapter titled “Dividend Policy” on page no 90 of the Prospectus. The amount of our future dividend payments, if any, will depend upon our future earnings, financial conditions, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that we shall have distributable funds or that we will declare dividends. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all.

13. The Objects of the Issue for which funds are being raised, are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page no. 44 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated on page no. 44 under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated on page no. 46 under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

14. We have not identified any alternate source of financing the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” on page no. 44 of this Prospectus.

15. We face intense competition in our businesses, which may limit our growth and prospects.

Our Company faces significant competition from companies seeking to attract clients’ financial assets. In particular, we compete with other Indian and foreign brokerage houses and public and private sector commercial banks operating in the markets in which we are present. In recent years, large international banks have also entered these markets.

We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history;
- Greater brand recognition among consumers;
- Larger customer base in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability.

This will further increase competition in the brokerage and other markets. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

16. Our insurance coverage may not adequately protect us against certain operating hazards and this may have an adverse effect on our business.

Our Company has availed stock brokers’ indemnity policies and comprehensive crimes and liabilities policy that provide coverage against incomplete transactions and computer crimes in compliance with byelaws including circulars of the various Indian stock exchanges. Apart from aforesaid policies, our Company has not availed any other insurance policy to cover any kind of risk. As our arrangements for insurance or indemnification are not adequate, we may be required to make substantial payments in the event of any damage and/or loss incurred. Further there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time.

17. Downturns or disruptions in the securities markets could reduce transaction volumes, and could cause a decline in the business and impact our profitability.

As a financial services company, our businesses are materially affected by conditions in the domestic and global financial markets and economic conditions in India and throughout the world. A significant portion of our revenues are derived from equity broking and merchant banking activities. Our revenues, level of operations and, consequently, our profitability are largely dependent on favourable capital market conditions, a conducive regulatory and political environment, investor sentiment, price levels of securities and other factors that affect the volume of stock trading in India and the level of interest in Indian business developments. For example, revenue generated by our broking, merchant banking and advisory business is directly related to the volume and value of the transactions in which we are involved. Many factors or events could lead to a downturn in the financial markets including war, acts of terrorism, natural catastrophes and sudden changes in economic and financial policies. These types of events could affect confidence in the financial markets and impair their ability to function effectively. Substantially all of our revenues in recent years have been derived from capital markets activities, and although we

continue to diversify our revenue sources, we expect this business to continue to account for a significant portion of our revenues in the foreseeable future. Capital markets are exposed to additional risks, including liquidity, interest rate and foreign exchange related risks. Any downturn or disruption in the securities markets and the capital markets specifically would have a material adverse effect on our results of operations. Even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility. A market downturn would likely lead to a decline in the volume of transactions that we execute for our customers as well as a decrease in prices. Any decline in transaction volumes would lead to a decline in our revenues received from commissions. Our results of operations would be adversely affected by any reduction in the volume or value of broking and merchant banking transactions. Our profitability may also be adversely affected by our fixed costs and the possibility that we would be unable to scale back other costs within a time frame sufficient to match any decreases in revenue relating to changes in market and economic conditions. Our ability to grow our recent business ventures such as merchant banking and investment advisory services may also be limited in difficult market conditions. Performance of our capital businesses such as investment of our excess liquidity through our internal operations may be affected due to conditions in the financial markets and economic conditions. We are unable to quantify the impact of any such adverse market conditions on our business and/or financial condition.

18. Our business is dependent on systems and operations availability and any interruptions in our transaction systems could lead to decline in our sales and profits.

We are dependent on our technology systems to perform the critical function of gathering, processing and communicating information efficiently, securely and without interruptions. We face risks arising from failures in our systems control processes or technology systems on which our ability to manage our business depends. Additionally, rapid increases in client demand may strain our ability to enhance our technology and expand our operating capacity. At the core of our on-line trading system there is an application based on very small aperture terminals ("VSAT"), /Leased Lines which has a direct connection with the NSE and allows investors to trade securities on-line. The VSAT-based network allows us to provide investors with real-time market data such as streaming quotes from each market due to better connectivity. A breakdown or interruption in the Indian domestic satellite system could have a material adverse effect on our business and client base. Our operations are highly dependent on the integrity of our technology systems and our success depends, in part, on our ability to make timely enhancements and additions to our technology in anticipation of client demands. To the extent we experience system interruptions, errors or downtime (which could result from a variety of causes, including changes in client use patterns, technological failure, changes to systems, linkages with third-party systems, and equipment and power failures), it would have a significant impact on our business and operations. While we maintain back up of all records at our offices in Mumbai, any unforeseen events or circumstances beyond our control at this office could result in loss of data and records and adversely affect our results of operations. We currently do not have a disaster recovery system, and will be fully exposed in case of natural or man-made disasters.

19. Our Company has entered into certain related party transactions.

Our Company has entered into certain transactions with related parties, including our Promoters and Promoter Group. Such transactions or any future transactions with our related parties may potentially involve conflicts of interest and impose certain liabilities on our Company. For more details, please refer to chapter titled "Related Party Transactions" on page 89 of the Prospectus

20. Our success depends in large part upon our management team and skilled personnel and our ability to attract and retain such persons.

We are highly dependent on our senior management, our directors and other key personnel. Our future performance will depend upon the continued services of these persons. The loss of any of the members of our senior management, our directors or other key personnel may adversely affect our results of operations and financial condition. Competition in the financial services industry for senior management and qualified employees is intense. Our continued ability to compete effectively in our businesses

depends on our ability to attract new employees and to retain and motivate our existing employees. Our inability to hire and retain such employees could adversely affect our business.

21. We could be exposed to risks arising from employee and business associate misconduct and trading errors.

Misconduct by employees could include their binding us to transactions that exceed authorized limits or present unacceptable risks to us, hiding unauthorized or unsuccessful trading activities from us or the improper use of confidential information. These types of misconduct could result in business risks or losses to us including regulatory sanctions and serious harm to our reputation. Furthermore, while our business associates work under our overall supervision and control and that each of their clients are directly registered with us on a revenue sharing basis. Our Business Associates are typically managed by independent entrepreneurs and not by our employees. We have significantly less control over the activities of our business associates than our employees. The precautions we take to prevent and detect these activities may not be effective. For example, some of our clients place orders over the telephone. If employee or Business Associate performs misconduct or commits trading errors, our business operations and reputation could have a material adverse impact.

22. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2009 appointment of monitoring agency is required only for Issue size above Rs. 50,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

23. Our trademark is not registered under the Trade Marks Act our ability to use the trademark may be impaired.

Our company's business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not have a registered trademark over our name and logo under the Trade Marks Act and consequently do not enjoy the statutory protections accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection.

EXTERNAL RISK FACTORS

24. Political, economic and social changes in India could adversely affect our business.

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

25. Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.

The revenues recorded and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and

assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

26. Natural calamities and force majeure events may have an adverse impact on our business.

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

27. Global economic, political and social conditions may harm our ability to do business, increases our costs and negatively affects our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, financial, banking or liquidity crises, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Our profitability may also be adversely affected by fixed costs and the possible inability to scale back other costs within a time frame sufficient to match any decreases in revenue relating to changes in market and economic conditions. Additionally, during periods of adverse economic conditions, we may have difficulty accessing financial markets, which could make it more difficult or impossible for us to obtain funding for additional investments and acquisitions. A general market downturn, or a specific market dislocation, may result in lower investment returns, which would adversely affect our revenues.

28. Restrictions on foreign investment limit our ability to raise debt or capital outside India.

Indian laws constrain our ability to raise capital outside India through the issuance of equity or convertible debt securities and restrict the ability of non-Indian companies to invest in us. Foreign investment in, or an acquisition of, an Indian company requires approval from the relevant government authorities in India, including the Reserve Board of India and the Foreign Investment Promotion Board.

29. Any downgrading of India's debt rating by a domestic or international rating agency could negatively impact our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

30. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may adversely affect the Indian markets on which our Equity Shares will trade. These acts may result in a loss of business confidence, make travel and other services more difficult and have other consequences that could have an adverse effect on our business. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of our Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse impact on our business. Such incidents could also create a greater perception that

investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our Equity Shares.

31. Third party statistical and financial data in this Prospectus may be incomplete or unreliable.

We have not independently verified any of the data from industry publications and other sources referenced in this Prospectus and therefore cannot assure you that they are complete or reliable. Discussions of matters relating to India, its economies or the industries in which we operate in this Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

RISKS RELATING TO THE EQUITY SHARES

32. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

33. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

34. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

Prior to the offer, there has been no public market for our Equity Shares, and an active trading market on the SME Platform of BSE. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the equity broking industry in India and volatility in the Exchange and securities markets elsewhere in the world. However, the LM will arrange for compulsory market making for a period of 3 years from the date of listing as per the regulations applicable to the SME Platforms under SEBI (ICDR) Regulations, 2009.

35. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

36. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Alacrity Securities Limited is acting as Designated Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the section titled "*General Information - Details of the Market Making Arrangement for this Issue*" on page 30 of this Prospectus.

37. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

INDUSTRY OVERVIEW**The Indian Economy**

India is the fourth largest economy in the world after the European Union, United States of America and China in purchasing power parity terms, with an estimated Gross Domestic Product (“GDP”) (purchasing power parity) of U.S.\$ 4.46 trillion in 2011 (Source: CIA World Factbook 2011). India rebounded from the global financial crisis, largely because of strong fundamentals and robust banking policies, posting a GDP growth of 7.8% in 2011. The Gross Domestic Product (GDP) in India expanded 0.8 percent in the second quarter of 2012 over the previous quarter. Historically, from 1996 until 2012, India GDP Growth Rate averaged 1.65 Percent reaching an all time high of 6.10 Percent in March of 2010 and a record low of -1.50 Percent in March of 2004.

Indian Financial Services Sector

The financial sector in India is characterized by liberal and progressive policies, vibrant equity and debt markets and prudent banking norms. India’s financial sector has been one of the fastest growing sectors in the economy. India has a financial system that is regulated by independent regulators in the sectors of banking, insurance, capital markets etc. The Indian financial sector attributes its growth to technology up gradation, consolidation of large broking houses, evolution of e-broking business, growth in retail segment, regulatory reforms, diversified asset instruments and foreign investment participation. There is huge growth potential in the Indian financial sector. Sectors such as banking, asset management and brokerage have been liberalized to allow private sector involvement, which has contributed to the development and modernization of the financial services sector.

Indian Capital Market

India has a transparent; highly technology enabled and well regulated stock / capital market. A vibrant, well developed capital market facilitates investment and economic growth. Today the stock markets are buoyant and have a range of players including mutual funds, FII, hedge funds, corporate and other institutions. Domestic savings and capital inflows are channelized in the capital markets. There were over 1,652 listings as of July 2012 on the nse and as of March 2012, there were over 5,133 listed Indian companies and over 8,196 scrips on the stock exchange. In recent years, the capital markets have undergone substantial reforms in regulation and supervision. Reforms, particularly the establishment of SEBI, market-determined prices and allocation of resources, screen-based nation-wide trading, t+2 settlement, scrip less settlement and electronic transfer of securities, rolling settlement and derivatives trading have greatly improved both the regulatory framework and efficiency of trading and settlement. There are presently 23 recognized stock exchanges in India.

Primary Security Market

Role of an efficient primary market is critical for resource mobilisation by corporates to finance their growth and expansion. Indian primary market witnessed renewed activity in terms of resource mobilisation and number of issues during 2010-11, continuing its momentum from 2009-10. In view of the recovery witnessed in equity markets post global financial crisis, companies, largely public sector with a divestment mandate, entered the primary market during 2010-11. Investors’ response to public issues was encouraging in 2010-11. Capital (equity and debt) was raised to the tune of 67,609 crore through 91 issues during 2010-11, higher than 57,555 crore mobilised through 76 issues during 2009-10. Continued reforms in the primary market further strengthened investors’ confidence. The primary market segment witnessed positive trend during 2010-11. Coal India Ltd. came out with India’s biggest-ever initial public offering (IPO) having issue size of 15,199.4 crore in October 2010. During 2010-11, a number of public sector undertakings (PSUs) raised money through primary market as part of disinvestment plan of Union Government. The total resource mobilisation by PSUs accounted for 56.5 percent of

total resources mobilised by all companies in 2010-11 as against 54.1 percent share in 2009-10. (Source - SEBI Annual Report).

Secondary Market

Equity market in India witnessed a significant uptrend during 2010-11 till October 2010. This was of significant FII inflows into India and number of IPOs/FPOs of companies like Coal India Ltd, Power Grid Corporation of India Ltd, Tata Steels Ltd, etc. coming to primary market which attracted number of investors to capital market. However, post Diwali in November 2010 when market touched its peak, Indian Securities Market took downward trend from December 2010 to February 2011 on account of significant FII outflows and concerns raised on domestic and international issues. However, the markets got revived in March 2011 as compared to February 2011 on account of easing of concerns on domestic and international issues and FIIs being net investor in Indian Markets in March, 2011 which helped the market sentiments (Source - SEBI Annual Report).

Market Capitalisation

The total market capitalization of securities available for trading on the CM segment increased from 63,350 crore (US \$ 115,606 million) as at end March 1995 to 60,96,518 crore (US \$ 11,10,679.18 million) as at end March 2012. (Source: NSE Fact book 2012)

Derivatives Market

Derivatives are meant to facilitate hedging of price risk of inventory holding or a financial/commercial transaction over a certain period. By providing investors and issuers with a wider array of tools for managing risks and raising capital, derivatives improve the allocation of credit and the sharing of risk in the global economy, lowering the cost of capital formation and stimulating economic growth. The financial derivatives gained prominence in post-1970 period due to growing instability in the financial markets and became very popular, in the recent years, the market for financial derivatives has grown both in terms of variety of instruments available, their complexity and turnover. India's experience with the equity derivatives market has been extremely positive. The derivatives turnover on the NSE has surpassed the equity market turnover. The turnover of derivatives on the NSE increased from 23,654 million in 2000-2001 to 292,482,211 million in 2010-2011, and reached 157,585,925 million in the first half of 2011-2012. The average daily turnover in these market segments on the NSE was 1,151,505 million in 2010-2011 compared to 723,921 in 2009-2010. (Source: Indian Securities Market, A Review (ISMR) of 2012 by NSE)

The details of utilization of proceeds are as per the table set forth below:

(Rs. in Lacs)		
S.N	Particulars	Proposed Utilizations of Issue Proceed

3	General corporate purposes	9.00
4	Public Issue Expenses	40.00
	Total	150.00

We propose to meet all the requirement of funds entirely from the proceeds of the Issue and, therefore, no amount is required to be raised through means other than the Issue for financing the same. Accordingly, regulation 4(2)(g) of the SEBI (ICDR) Regulations, 2009 (which requires firm arrangements of finance through verifiable means for 75% of the stated means of finance, excluding the amount to be raised through the proposed Issue) does not apply to the Issue.

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page no. 44 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds towards the Objects of the Issue is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as proposed in the “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

**Details of the Objects****1. Expanding our domestic operations and network of branches.**

We currently operate from our registered office in Goregaon i.e. western suburb of Mumbai. We believe that organic growth can be achieved only by expanding our geographical presence. Going forward, we intend to set up three (3) branches in and around Mumbai on lease and license basis.

Sr.No.	Particulars	Amount (Rs. in Lacs)
a)	Setting up three (3) branch offices	51.00
	Total	51.00

a) Setting up branch offices

We want to expand our reach by setting up 3 branches on lease / rental basis. The cost involved in setting up a new branch on lease and license basis primarily comprises of deposit/advance rent for lease & license arrangements, expenditure on interiors, furniture and fixtures, electrical, installation of computers, network-connectivity, etc. Except the advance rent/ deposit for lease & license component, the other costs largely remain the same for similar sized branches in all the cities. We intend to utilize approx. Rs. 51 lacs for establishing three (3) branches. The details of the cost of the establishing each branch are provided as below:

Particulars	Estimated Cost (Rs. in Lacs)
Deposits/ advance rentals (800-1000 Sq. ft.)	1.50
Furniture & Fixtures	4.00
IT & Other office equipment	8.50
Pre-Operative Administrative expenses	3.00
Total	51.00

The time taken to establish a branch may range from three to four months from the date of identification of the location of the prospective branch. Since the time required in establishing a branch is relatively short, we will be setting up these branches after completing the Issue, therefore, we have not made any arrangements for establishment of any of these branches.

2. Enhancement of margin money maintained with the exchanges

Part of the proceeds of this Issue will be utilized for the margins to be placed with the stock exchanges including BSE as well as NSE. The margin requirements with the exchanges are determined on the basis of trading volumes and market volatility and to the extent of open interest in respect of equity/ stock future.

Such margin requirements comprise of “initial margin” representing initial margin paid and “margin deposits”, representing additional margin over and above the initial margin, for entering into contracts for equity index/ stock futures, which are released on final settlement and/or squaring up of underlying contracts. Further, equity index/ stock futures are marked-to-market on a daily basis, in which case, “mark-to-market margin” is required to be provided, representing the net amount paid or received on the basis of movement of price/ stock futures till the balance sheet date. While the initial margin and the margin deposits with the stock exchanges/ professional clearing members can be created by way of deposit of either stock or bank guarantees or fixed deposits with banks or cash, however, the marked-to-market margin is typically created by way of deposit of cash. With the proposed expansion in the operation and branch network and the growth plan envisaged by our Company, we expect our trading volumes to increase leading to additional margin capital requirements for our Company.

Consequently, we propose to deploy Rs. 50 Lacs out of Issue proceeds by fiscal 2015 and fiscal 2016 towards enhancing the margins with the exchanges through either bank guarantees or fixed deposits with banks or cash. Such capital infusion will enable us to undertake more business in equities and derivatives markets.

SECTION IV

ABOUT OUR COMPANY

INDUSTRY OVERVIEW

Industry Overview

The securities market achieves one of the most important functions of channeling idle resources to productive resources or from less productive resources to more productive resources. Hence in the broader context the people who save and investors who invest focus more towards the economy's abilities to invest and save respectively. This enhances savings and investments in the economy, the two pillars for economic growth. The Indian Capital Market has come a long way in this process and with a strong regulator it has been able to usher an era of a modern capital market regime. The past decade in many ways has been remarkable for securities market in India. It has grown exponentially as measured in terms of amount raised from the market, the number of listed stocks, market capitalisation, trading volumes and turnover on stock exchanges, and investor population. The market has witnessed fundamental institutional changes resulting in drastic reduction in transaction costs and significant improvements in efficiency, transparency and safety.

Overview of the Indian Economy

India is the fourth largest economy in the world after the European Union, United States of America and China in purchasing power parity terms, with an estimated Gross Domestic Product ("GDP") (purchasing power parity) of U.S.\$ 4.46 trillion in 2011 (Source: CIA World Factbook 2011). India rebounded from the global financial crisis, largely because of strong fundamentals and robust banking policies, posting a GDP growth of 7.8% in 2011.

Indian Financial Services Sector

The financial sector in India is characterized by liberal and progressive policies, vibrant equity and debt markets and prudent banking norms. India's financial sector has been one of the fastest growing sectors in the economy. India has a financial system that is regulated by independent regulators in the sectors of banking, insurance, capital markets etc. India. The Indian financial sector attributes its growth to technology up gradation, consolidation of large broking houses, evolution of e-broking business, growth in retail segment, regulatory reforms, diversified asset instruments and foreign investment participation. There is huge growth potential in the Indian financial sector. Sectors such as banking, asset management and brokerage have been liberalized to allow private sector involvement, which has contributed to the development and modernization of the financial services sector. This is particularly evident in the nonbanking financial services sector, such as equities, derivatives and commodities brokerage, residential mortgage and insurance services, where new products and expanding delivery channels have helped these sectors achieve high growth rates.

Dependence on Securities Market

Three main sets of entities depend on securities market - the corporates, the government & households. While the corporates and governments raise resources from the securities market to meet their obligations, the households invest their savings in securities.

Primary Market & Secondary Market

The securities market has two interdependent and inseparable segments, the new issues (primary) market and the stock (secondary) market. The primary market provides the channel for creation and sale of new securities, while the secondary market deals in securities previously issued. The Stock market or Equities market is where listed securities are traded in the secondary market. Currently more than 1300 securities are available for trading on the Exchange. There are two major types of issuers who issue securities. The corporate entities issue mainly debt and equity instruments (shares, debentures, etc.), while the governments (central and state governments) issue debt securities (dated securities, treasury bills). The two major exchanges, namely the NSE and the BSE provide trading of securities.

Indian Capital Markets

The origination of the Indian securities market may be traced back to 1875, when 22 enterprising brokers under a Banyan tree established the Bombay Stock Exchange (BSE). Over the last 125 years, the Indian securities market has evolved continuously to become one of the most dynamic, modern and efficient securities markets in Asia. Today, Indian markets conform to international standards both in terms of structure and in terms of operating efficiency. *Structure and size of the markets* Today India has two national exchanges, the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE). Each has fully electronic trading platforms. Growth of Stock Broking Capital markets all over the world are witnessing major changes. With escalating interests of domestic and international players in India, there is an increasing demand for a more systematic approach. SEBI is also trying to bring transparency in the dealings. Economic growth and liberalisation has opened number of opportunities in various organisations like mutual funds, investment consultancy, broker firms, insurance companies, merchant banks, pension funds and other financial institutions. Foreign institutional investors, mutual funds and even individuals have once again started posing confidence in the capital markets. This has enhanced prospects for brokers, investment and equity analysts. They can also start their own consultancies. Stock exchanges to some extent play an important role as indicators, reflecting the performance of the country's economic state of health. There are three main factors behind the changes in the stock-broking business. First, the shift from floor-based to screenbased trading in 1994. This brought transparency into trade execution and raised the confidence of investors. The result has been lower transaction charges and increased convenience. This has helped both the investors and the brokers. The second change was dematerialisation. Before this, buying or selling shares was a difficult matter. Even when an investor bought shares, he was not sure whether they would be transferred in his name. But now these concerns are no longer there. The introduction of futures and options was the third major factor that has changed the face of the stockbroking business as it is a new avenue for revenue. (Source: *The Hindu Business Line*)

Stocks in India had a negative performance during the month of October 2012. India Stock Market (SENSEX) declined 373 points or 2.00 percent during the last 30 days. The Index has a base value of 100 as of 1978-79.

Wider Scope of Activities

The stock brokers in India have broadened their scope of activities. Equity broking business being cyclical, many players are also entering new areas of activity. Apart from mere broking (buying and selling) of stocks the big players in the industry are concentrating on other aspects like research, portfolio management services, commodity and derivative trading and distribution of financial products including mutual funds and insurance

schemes, 33 Expansion Mode BUOYED by booming stock markets and growing retail interest in equity and equity-related investments, Indian stock broking firms are on an expansion drive to increase their network into more cities and towns to lure clients into stock investments.

The Derivative Market

One of the outstanding features of the Indian Capital Market in recent years is the growth of the equity derivative market. Indian stock exchanges have already started with efforts at building a modern, transparent, well regulated derivative market. Other aspects of the market such as the increasing sophistication and range of tradable financial products add to the attractiveness of the market as a whole. The availability of derivative products including index futures, index options, individual stock futures and individual stock options re-enforces the overall attractiveness of this market to foreign and domestic investors. The derivatives market in only two years has shown spectacular growth. India's experience with the equity derivatives market has been extremely positive. The derivatives turnover on the NSE has surpassed the equity market turnover. The turnover of derivatives on the NSE increased from 23,654 million in 2000-2001 to 292,482,211 million in 2010-2011, and reached 157,585,925 million in the first half of 2011-2012. The average daily turnover in these market segments on the NSE was 1,151,505 million in 2010-2011 compared to 723,921 in 2009-2010.

India is one of the most successful developing countries in terms of a vibrant market for exchange traded derivatives. This reiterates the strengths of the modern development in India's securities markets, which are based on nationwide market access, anonymous electronic trading, and a predominant retail market. There is an increasing sense that the equity derivatives market plays a major role in shaping price discovery.

Our Company intends to continue to build a diversified business platform by identifying business opportunities with long term prospects for growth and profitability and offering products and services across a broad spectrum of financial services. RISK MANAGEMENT

We believe that effective risk management is of primary importance to the success of our operations. Accordingly, we have deployed necessary resources in terms of technology, people and processes to monitor, evaluate and manage the principal risks we assume in conducting our activities which include market, credit & liquidity, operational, legal and reputation risks.

We analyze factors and reasons causing risk on a periodic basis, plan for control of identified risks, decide on and implement appropriate risk management tools and monitor policies and procedures with the view of continuous improvement.

TECHNOLOGY AND NETWORK SUPPORT SYSTEM

We recognize the need to have a sophisticated technology network in place to meet our customer needs, reduce processing costs and maintain a risk management system. Our technology infrastructure is aimed at ensuring that our trading and information systems are reliable and performance enhancing and that client data are protected.

Our Company intends to upgrade its existing technology infrastructure further. The upgrades would include replacing the existing trading and database servers with high-end servers considering the increased volumes. The customers are savvy and demanding. Our Company will offer more products such as web trading and reporting. Customer Relationship Management system too would be put in place.

As business grows, there would be a growing need to put in place a more sophisticated risk management and monitoring system. The back office systems too will need to be modernized to cater to a larger client base and distributed processing demands. From compliance point of view, our Company put in places a data mine and systems for the same. Disaster recovery being the need of the hour for continuous and uninterrupted flow of operations is proposed to be set up.

COMPETITION

We face the competition in all the operations. Our competitors are other broking firms and financial advisory firms. We compete with some of our competitors nationally and with others on a regional, product or business line basis. Many of our competitors have substantially large capital base and resources than we do and offer a broader range of financial products and services. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the services and products. In recent years there has been substantial consolidation and convergence among companies in the financial services industry. This trend toward consolidation and convergence has significantly increased the capital base and geographic reach of many of our competitors. Many of our competitors

have the ability to offer a wider range of products and services that may enhance their competitive position. They may also have the ability to support securities products and services with commercial banking, insurance and other financial services capabilities in an effort to gain market share, which could result in pricing pressure in our businesses. We have experienced intense price competition like discounts in large block trades and trading commissions and spreads. The ability to execute trades electronically through the Internet and through other alternative trading systems has increased the pressure on trading commissions and spreads. We believe that this trend toward alternative trading systems will continue. Our ability to continue to compete effectively in our businesses will depend upon our continued ability to attract new professionals and retain and motivate our existing professionals.

EXPORT POSSIBILITY AND OBLIGATION

Our Company doesn't have any export obligation as we are not exporting any material.

The information detailed in this chapter has been obtained from the various legislations and the bye laws of the respective local authorities that are available in the public domain. The regulations and policies set out below are not exhaustive and are only intended to provide general information to the investors and are neither designed nor intended to be a substitute for professional advice.

Dealing in Securities:

Securities regulation in India takes place under the provisions of the Securities Contracts Regulations Act, 1956 with Rules and Regulations (SCRA), Securities Exchange Board of India Act, 1992 (SEBI), the Depositories Act, 1996 and the rules and regulations promulgated there under. The main legislations governing the securities market are as follows:

(a) **SEBI Act, 1992:** The SEBI Act, 1992 establishes SEBI with statutory powers for (a) protecting the interests of investors in securities, (b) promoting the development of the securities market, and (c) regulating the securities market. Its regulatory jurisdiction extends over corporates in the issuance of capital and transfer of securities, in addition to all intermediaries and persons associated with securities market. It can conduct enquiries, audits and inspection of all concerned and adjudicate offences under the Act. It has powers to register and regulate all market intermediaries and also to penalize them in case of violations of the provisions of the Act, Rules and Regulations made there under. SEBI has full autonomy and authority to regulate and develop an orderly securities market.

(b) **Securities Contracts (Regulation) Act, 1956:**

The SCRA seeks to prevent undesirable transactions in securities by regulating the business of dealing in securities and other related matters. The SCRA provides for grant of recognition for stock exchanges by the Central Government. Every recognized stock exchange is required to have in place a set of rules relating to its constitution and bye-laws for the regulation and control of contracts.

The bye-laws normally provide *inter alia* for:

- (i) the opening and closing of markets and the regulation of the hours of trade;
- (ii) the fixing, altering or postponing of days for settlements;
- (iii) the determination and declaration of market rates, including the opening, closing highest and lowest rates for securities;
- (iv) the terms, conditions and incidents of contracts, including the prescription of margin requirements, if any, and conditions relating thereto, and the forms of contracts in writing;
- (v) the regulation of the entering into, making, performance, recession and termination of contracts, including contracts between members or between a member and his constituent.

(c) **Stock Broker Regulations:**

Further, the SEBI (Stock Brokers and Sub-Brokers) Regulations, 1992 provides the eligibility criteria and conditions required to be satisfied in order to obtain the certificate of registration. They further provide the procedure for obtaining the certificate of registration to carry on business as a stock broker and/or a sub-broker who is required to be affiliated to a stock broker registered under the aforesaid regulations. On registration, the stockbroker and sub-broker are required to adhere to a code of conduct prescribed under the Stock Broker Regulations. In addition, a stock broker and/or a sub-broker is required to abide by the rules, regulations and bye-laws of the stock exchange or stock exchanges of which it is a member. Further, in case of any change in its status or constitution, the stock broker and/or the sub-broker are

required to obtain the prior permission of SEBI in order to continue to buy, sell or deal in securities in any stock exchange.

Apart from the registration of stockbrokers and sub-brokers, the Stock Broker Regulations provide for registration of trading and clearing members. A trading member is a member of the derivatives exchange or derivatives segment of a stock exchange and who settles the trade in the clearing corporation or clearing house through a clearing member. A clearing member is a member of a clearing corporation or clearing house of the derivative exchange or derivatives segment of an exchange, which clears and settles transactions in securities.

(d) Insider Trading Regulations:

The SEBI (Prohibition of Insider Trading) Regulations, 1992, as amended from time to time (“**Insider Trading Regulations**”) govern the law with respect to insider trading in India. The Insider Trading Regulations *inter alia* prohibit all insiders from dealing in securities of a listed company when the insider is in possession of unpublished price sensitive information (“**UPSI**”). It further prohibits an insider from communicating, counselling or procuring, directly or indirectly, any UPSI to any person who while in possession of such UPSI is likely to deal in such securities. Information is said to be price sensitive if it is likely to materially affect the price of the securities of the company to which it relates.

Under the Insider Trading Regulations, the concept of an “insider” is related to those of a connected person and a deemed connected person. A person is said to be connected to a company when he or she is a director, employee or officer in the company or stands in a professional or business relationship with the company and when he or she may reasonably be expected to have access to UPSI and includes *inter alia* market intermediaries, Merchant Bankers, share transfer agents, registrars to an issue, debenture trustees, brokers, Portfolio Managers, investment advisors. The Insider Trading Regulations further provide that all listed companies and organisations associated with the securities market including *inter alia* intermediaries as defined under the SEBI Act, asset management companies, trustees of mutual funds etc. should frame a code of internal procedures and conduct based on the Model Code of Conduct specified under the Insider Trading Regulations.

(e) Fit and Proper Person Criteria:

The criteria for determination of whether an entity can be registered under any of the above regulations are governed by the SEBI (Criteria for Fit and Proper Person) Regulations, 2004. The Company is also required, as an intermediary, to be registered under the SEBI (Central Database of Market Participants) Regulations, 2003.

(f) Companies Act, 2013: It deals with issue, allotment and transfer of securities and various aspects relating to company management. It provides for standard of disclosure in public issues of capital, particularly in the fields of company management and projects, information about other listed companies under the same management, and management perception of risk factors. It also regulates underwriting, the use of premium and discounts on issues, rights and bonus issues, payment of interest and dividends, supply of annual report and other information.

Depository Regulations:

Every person subscribing to securities offered by an issuer has the option either to receive the security certificates or hold securities with a depository. All securities held by a depository are required to be dematerialised and in a fungible form. A depository after obtaining a certificate of commencement of business from SEBI can enter into an agreement with one or more participants as its agent. Any person, through a participant, may enter into an agreement with any depository for availing its services.

They also provide the various rights and obligations of the depository participants. On registration, the depository participant is required to adhere to a code of conduct prescribed under the Depository Regulations.

The depository is deemed to be the registered owner for the purposes of effecting transfer of ownership of security on behalf of a beneficial owner. The depository does not have any voting rights or any other rights in respect of securities held by it. The beneficial owner of the securities is entitled to all the rights and benefits and is subjected to all the liabilities in respect of his securities held by a depository.

OVERVIEW OF THE BUSINESS

THE INDUSTRY OVERVIEW

Indian Capital Market

India has a transparent; highly technology enabled and well regulated stock / capital market. A vibrant, well developed capital market facilitates investment and economic growth. Today the stock markets are buoyant and have a range of players including mutual funds, FII's, hedge funds, corporate and other institutions. Domestic savings and capital inflows are channelized in the capital markets. There were over 1,652 listings as of July 2012 on the nse and as of March 2012, there were over 5,133 listed Indian companies and over 8,196 scrips on the stock exchange. In recent years, the capital markets have undergone substantial reforms in regulation and supervision. Reforms, particularly the establishment of SEBI, market-determined prices and allocation of resources, screen-based nation-wide trading, t+2 settlement, scrip less settlement and electronic transfer of securities, rolling settlement and derivatives trading have greatly improved both the regulatory framework and efficiency of trading and settlement. There are presently 23 recognized stock exchanges in India.

FACTORS AFFECTING OUR FUTURE RESULTS OF OPERATIONS

Our business, prospects, financial condition and results of operations are affected by a number of factors, including the following which we believe are of particular importance:

Regulatory developments and authorities

Our activities are subject to supervision and regulation by multiple statutory and regulatory authorities including SEBI and the exchanges. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India's securities sectors. Changes in government and other regulatory policies affecting the financial services industry could require changes to our systems and business operations and could involve additional costs and management time. Other general changes in economic and regulatory policy may also affect our business, as they affect the businesses, financial health and investment policies of our customers. Some policy changes may be beneficial to our business, while others may have a negative impact.

Performance of Indian Economy

As a financial services company with businesses operating in the domestic Indian market, our performance and the growth of our business are significantly dependent on the performance of the Indian economy. India's economy could be adversely affected by a general rise in interest rates, currency exchange rates, adverse conditions affecting food and agriculture, commodity and electricity prices or various other factors. A slowdown in the Indian economy could adversely affect our business, including its ability to implement our strategy. The Indian economy is currently in a state of transition and it is difficult to predict the impact of certain fundamental economic changes upon our business. Conditions outside India, such as slowdowns in the economic growth of other countries or increases in the price of oil, have an impact on the growth of the Indian economy, and Government policy may change in response to such conditions. While recent Governments have been keen on encouraging private participation in the industrial sector, any adverse change in policy could result in a slowdown of the Indian economy. Additionally, these policies will need continued support from stable regulatory regimes that stimulate and encourage the investment of private capital into industrial development. Any downturn in the macroeconomic environment could have an adverse effect on our results of operations and financial condition.

Intense Competition

Our Company faces significant competition from companies seeking to attract clients' financial assets. In particular, we compete with other Indian and foreign brokerage houses, public and private sector commercial banks operating in the markets in which we are present. In recent years, large international banks have also entered these markets.

Ability to attract, recruit and retain key personnel.

We are highly dependent on our senior management, our directors and other key personnel. Our future performance will depend upon the continued services of these persons. The loss of any of the members of our senior management, our directors or other key personnel may adversely affect our results of operations and financial condition. Competition in the financial services industry for senior management and qualified employees is intense. Our continued ability to compete effectively in our businesses depends on our ability to attract new employees and to retain and motivate our existing employees. Our inability to hire and retain such employees could adversely affect our business.

DISCUSSION ON THE RESULTS OF OPERATIONS

The following discussion on the financial operations and performance is based on our restated financial statements for the FY 2009-10, 2010-2011, 2011-2012, 2012-2013 and 2013-2014. The same should be read in conjunction with the restated audited financial results of our Company for the years ended March 31, 2010, 2011, 2012, 2013 and 2014.

Information required as per Item (2) (IX) (E) (5) of Part A of Schedule VIII to the SEBI Regulations:

1. Unusual or infrequent events or transactions

Except as described in this Prospectus, there have been no other events or transactions that, to our knowledge, may be described as “unusual” or “infrequent”.

2. Significant economic changes

Our Company’s operations are dependent on the general economic conditions and any changes in economic conditions may have an adverse impact on the entire industry and consequently on our operations.

3. Known trends or uncertainties

Except as described in “Risk Factors” and “Management Discussion and Analysis of Financial Condition and Results of Operations” and in the Prospectus, our Company believes there are no known trends or

uncertainties that are expected to have a material adverse impact on our revenues or income from continuing operations.

4. The extent to which material increase in net sales or revenues are due to increased sales volume, introduction of new products or services or increased sales prices.

Our increases in net sales are primarily by the number of active clients and the volume of business done by them

5. New Products or business segments

Other than as described in “Our Business” in this Prospectus, our Company is not planning to introduce any new products or business segments.

6. Business segment in which our Company operates

We are a financial services providing company. We operate in a single segment viz Equity and currency derivatives broking.

7. Seasonality of business

Our business & level of operations are not seasonal in nature. Our business depends upon the market condition.

8. Dependence on single or few clients

Our Company's operations are not dependent on a particular client or group of clients.

9. Competitive conditions

We face the competition in all the operations. Our competitors are other broking firms and financial advisory firms. We compete with some of our competitors nationally and with others on a regional, product or business line basis. Many of our competitors have substantially large capital base and resources than we do and offer a broader range of financial products and services. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the services and products. In recent years there has been substantial consolidation and convergence among companies in the financial services industry. This trend toward consolidation and convergence has significantly increased the capital base and geographic reach of many of our competitors. Many of our competitors have the ability to offer a wider range of products and services that may enhance their competitive position. They may also have the ability to support securities products and services with commercial banking, insurance and other financial services capabilities in an effort to gain market share, which could result in pricing pressure in our businesses. We have experienced intense price competition like discounts in large block trades and trading commissions and spreads. The ability to execute trades electronically through the Internet and through other alternative trading systems has increased the pressure on trading commissions and spreads. We believe that this trend toward alternative trading systems will continue. Our ability to continue to compete effectively in our businesses will depend upon our continued ability to attract new professionals and retain and motivate our existing professionals.
