SECTION II - RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Prospectus, including the risks and uncertainties summarised below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material aspects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless stated otherwise, in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. The following factors have been considered for determining the materiality of Risk Factors:

The risk factors are classified as under for the sake of better clarity and increased understanding:

Internal Risk Factors

A. Business Risk

1. Our Company, Promoters, Directors and Group Companies may be party to certain legal proceedings. Any adverse decision in any such material proceedings may have an adverse effect on our business, results of operations and financial condition.

Our Company, Promoters, Directors and Group Companies are involved in a few legal proceedings which are pending at different levels of adjudication before various courts, tribunals and forums. However, none of the pending litigations are material litigation. However, any adverse decision in any of the future litigation may render us liable to liabilities/penalties and may have an adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

As on date of filing this Prospectus following litigations pending against our Directors/Promoters :-

Name	Designation	No of Cases of Income Tax	Consolidated Amount Involved
Manoj Kumar Agrawal	Director & Promoter	1	Rs. 0.33 Lakh
Ratan Kumar Agrawal	Managing Director & Promoter	3	Rs 1.09 Lakh
Shakuntala Devi Agrawal	Director & Promoter	1	Rs 0.01 Lakh

For further details regarding these legal proceedings, please refer “Outstanding Litigations and Material Developments” on page 157 of this Prospectus.

2. Our business is dependent on the road network and our ability to utilize our vehicles in an uninterrupted manner. Any disruptions or delays in this regard could adversely affect us and lead to a loss of reputation and/ or profitability.

Our business operations i.e. goods transportation business are dependent on the road network. There are various factors which affect road transport such as political unrest, bad weather conditions, natural calamities, regional disturbances, fatigue or exhaustion of drivers, improper conduct of the drivers/ motormen, accidents or mishaps and third party negligence. Even though we undertake various measures to avoid or mitigate such factors to the extent possible, some of these could cause extensive damage and affect our operations and/ or condition of our fleet and thereby increase our maintenance and operational costs. Also, any such interruption or disruptions could cause delays in the delivery of our consignments to their destination and/ or also cause damage to the transported cargo. We may be held liable to pay compensation for losses incurred by our customers in this regard, and/ or losses or injuries sustained by other third parties. Further, such delays and/ or damage may cause a loss of reputation. In the event that the goods to be delivered have a short shelf life, any delay in the delivery of such cargo could also expose us to additional losses and claims. Although, some of these risks are beyond our control, we may still be liable for the condition of such cargo and their timely delivery and any disruptions or delays could adversely affect us and lead to a loss of reputation and/or profitability. For further details regarding our business, please refer “Our Business” on page 84 of this Prospectus.

3. Our Company’s business requires several regulatory licenses and approvals. Failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.

Our Company requires several regulatory licenses and approvals for operating the business. It is subject to a number of transportation laws and regulations which are liable to change in accordance with new legislation and regulatory initiatives. Our Company is required to comply with various regulations in connection with restrictions which specify the actual weight to be carried by our vehicles, permissible emission limits or restrictions on the age of vehicles operating within certain states of India. Many of these approvals require renewal from time to time. Though the application for renewal of existing licenses/approvals will be made to the respective authorities as and when required, there can be no assurance that the relevant authority will renew any of such licenses/approvals. If our company does not receive the requisite approvals/licenses, our operations may be adversely affected. Further, these permits, licenses and approvals are subject to several conditions and failure to adhere to such conditions may lead to cancellation, revocation or suspension of relevant permits, licenses and/or approvals. Cancellation and / or failure to renew, maintain or obtain the required permits, licenses or approvals

may result in the interruption of our Company's operations and may have a material impact on our business. For further details regarding statutory approvals, please refer to the chapter titled "Government and Other Approvals" on page 161 of this Prospectus.

4. Major portion of our revenue depends upon our few customers. The loss of any one or more of our major customers would have a material adverse effect on our business operations and profitability.

We derive a major portion of our revenue from a few customers. Our top ten customers contributed approximately 58% of our revenues for the first six months of the financial year 2017-18 ending on September 30, 2017. There is a concentration risk as any decline in our quality standards, growing competition and any changes in the demand for our services by any of these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenues generated from these customers might change as we continue to add new customers in normal course of business. As on September 30, 2017, our overall customer base spreads to over 200 customers covering private players as well as public sector undertakings from steel, aluminum, cement, petrochemicals, paper, marble, infra, textile and agro industry to name a few. We intend to retain our customers by offering solutions to address specific logistic needs in a proactive, cost effective and time efficient manner along with adding new customers.

5. Our inability to pass on any increase in operating expenses, particularly fuel costs, to our customers which may adversely affect our business and results of operations.

Fuel costs, toll charges and lorry hire charges represent some of our major operating costs and an increase in such costs or inability to pass on such increase to our customers will adversely affect our results of operations. In particular, the cost of fuel has increased in recent times and it fluctuates significantly due to various factors beyond our control, including, international prices of crude oil and petroleum products, global and regional demand and supply conditions, geopolitical uncertainties, import cost of crude oil, government policies and regulations and availability of alternative fuels. In recent times, the cost of fuel has been fluctuating as the government has allowed the public-sector oil marketing companies to decide the cost of fuel daily as against the previous system for auto fuel in this context. Although in our contracts with few of our customers, we have price variation/diesel variation clause where in the transportation rates are linked and adjusted to the fluctuation in the price of diesel beyond a certain level during the contract, a part of the fluctuation in to be borne by our Company. However, historically we have generally been able to pass on any increase in the cost of fuel or other operating costs to the customers through periodic increase in our freight rates, there can be no assurance that we will be able to pass on any such increase in the future to our customers either wholly or in part, and our profitability and results of operations may be adversely affected as a result of that. Further, our Company might not be able to accurately gauge or predict the volatility and trends in the movements of the cost of fuel which may affect our business plans and prospects, growth estimates, financial condition and results of operations.

6. Claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured may adversely affect our business, results of operations and financial condition.

Our business is subject to various risks inherent in the goods transportation industry, including potential liabilities towards our customers which could result from, among other circumstances, damage to property arising from accidents or incidents involving vehicles operated by us. In our goods transportation business, we may be exposed to claims related to cargo loss, theft and damage, property and casualty losses and general liabilities from our customers. In the event of any damage or loss of goods, we may be required to compensate our customers. There have been instances in the past where the customers have made deductions in the payments because of shortage of materials during the transit. While we endeavor to recover such losses, as well as related losses of freight through auctioning the damaged goods or recovery from the truckers, there can be no assurance that we will fully or partially recover any such losses.

Furthermore, any accident or incident involving our vehicles and vehicles hired by us, even if we are fully insured or held not to be liable, could negatively affect our goodwill among customers and the public and could

significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, results of operations and financial condition may be materially and adversely affected.

7. We do not verify the contents of the parcels transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.

We transport various goods as part of our goods transportation business, other than goods that are classified as hazardous or illegal. While we obtain a declaration from the customer regarding the contents of the parcel and its value, we do not independently verify its contents. We also do not have any equipment to enable us to verify all our consignments prior to loading in our vehicles. Accordingly, we are unable to guarantee that these parcels do not contain any hazardous or illegal goods. In such circumstances, our vehicles may be confiscated, which could in turn, adversely affect our operations and reputation. In addition, our courier business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us.

8. Our Company is proposing to increase its fleet of trucks and consequently also expect demand for qualified drivers to increase. We are working in a man-power centric industry and trained and qualified drivers are crucial to our performance and if our Company is unable to attract and retain a sufficient number of qualified drivers, our business, financial condition and results of operations could be adversely affected.

As our Company is proposing to increase its fleet of trucks, our Company has to rely significantly on our drivers. There has been an increase in the demand for qualified drivers in the industry in recent years. Any shortage of drivers could force us to further increase driver compensation along with incentives, which could adversely affect our Company's profitability unless our Company is able to offset the increased compensation costs with the attrition rate of the drivers. This high attrition rate requires us to continuously recruit a substantial number of drivers in order to operate vehicles. If our Company is unable to attract and retain a sufficient number of qualified drivers, we could be forced to decrease the number of assignments our vehicles or limit our growth which may could have a material adverse effect on our business, financial condition and results of operations.

9. Our company has not complied with certain statutory provisions of the Companies Act. Such non-compliance may attract penalties and other actions against our Company and its Directors which could impact the financial position of us to that extent.

Our Company in the past has inadvertently borrowed certain amount which termed as deposits under the purview of Section 58A of Companies Act, 1956/ Section 73 of the Companies Act, 2013. However the same have been repaid and there is no such unsecured loans outstanding as on date of filing the prospectus.

Our company has inadvertently submitted incorrect copy of special resolution and notice with Form PAS 3 giving details about issuance of bonus and approval for IPO by the shareholders, however we have filed the correct special resolution in form MGT 14.

Our Company has not complied with certain statutory provisions under the Companies Act 1956 /2013 in respect of filing of forms for instance , ADT 1 for FY 2015-16, 2016-17 , Form 23 for increase in authorized/paid up capital, MGT 14 for disclosure of director's interest for FY 2014-15 and approval of financial statements & director's report for which Company has applied for condonation of delay and

Our company is unable to trace most of the challans of ROC filing therefore we are not able to ascertain that was there any delay in submission of forms.

All the above non-compliances may result in penalties or other action against our Company. Further our Company has appointed a whole time Company Secretary and is in the process of setting up a system to ensure that requisite filings and compliances are done within the applicable timelines

10. Our branch offices, from where we operate, are taken on leave and license. Discontinuation of agreements may require us to vacate such premises which may have an adverse impact on our business continuity and profitability.

If any of the owners of the premises of our branch offices, do not renew the agreements under which we occupy the premises or renew such agreements on terms and conditions that are unfavorable to us, we may suffer a disruption in our operations which could have a material adverse effect on our business, financial condition and results of operations.

For some of our branch premises agreements have expired and not renewed. We cannot assure that we shall have the right to occupy these premises in future, or that we will be able to continue with the uninterrupted use of these premises. In case we are not allowed to use these premises, it may impair our operations and adversely affect our financial condition. For details on such premises please refer to chapter titled “Our Business” beginning on page 84 of this Prospectus.

11. We are dependent on various third parties for the adequate and timely supply of equipment and maintenance of our vehicles, and any delays or increase in costs related thereto may adversely affect our business.

We are dependent upon suppliers and other persons for supply of vehicle related equipment and maintenance and/or servicing of the vehicles. There can be no assurance that such suppliers will continue to supply such vehicles related equipment, spares, tyres or other materials in quantities or prices that are commercially acceptable to us or at all. Events beyond our control may have an adverse effect on the cost or availability of raw materials, components and spare parts.

12. We may be unable to meet certain contractual obligations including timelines of deliveries, due to which we could be liable to claims by customers, suffer adverse publicity and may incur substantial costs as a result of deficiency in our services, which in turn could adversely affect our results of operations.

Many of our contracts/assignments involve providing services that are critical to the operations of our customers' business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. In our contracts, we have commitments for safe and timely delivery of the cargo. Any failure to meet the scheduled timelines set by our customers or loss or damage to cargo may lead to our customers raising claims against us. Although, we attempt to limit our contractual liability for all damages, including consequential damages, in rendering our services, we cannot be assured that the limitations on liability we provide for in our service contracts will be enforceable in all cases, or that they will otherwise be sufficient to protect us from liability for damages.

Further, in certain instances we may also be required to provide performance bank guarantees to our customers and in case we are not able to perform our contractual obligations, the customers may invoke the bank guarantees to claim damages. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a large deductible or co-insurance requirement, could adversely affect our financial condition and results of operations.

13. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event, we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain

at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

14. We face intense competition since our Company operates in a highly competitive industry and competition may have a negative impact on our business prospects, future performance and financial condition.

Our Company operates in a very fragmented and competitive industry, dominated by a large number of unorganized players. Increased competition may lead to revenue reductions, reduced profit margins, or a loss of market share, any of which could adversely affect our business and results of operations. Transportation industry comprises of both organised and unorganised players in the market.

There are various factors that could impair our ability to maintain our current levels of revenues and profitability in our goods transportation business, including the following:

- Competition with other companies offering goods transportation services, some of which may develop a broader coverage network, a wider range of services, and may have greater capital resources than we do;
- Reduction by our competitors of their freight rates to gain business, especially during times of declining growth rates in the economy, which may limit our ability to maintain or increase freight rates, maintain our operating margins, or maintain significant growth in our business;
- Solicitation by customers of bids from multiple carriers for their transportation needs and the resulting depression of freight rates or loss of business to competitors;
- Development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the transportation services industry;
- Establishment of better relationships by our competitors with the customers;
- The small unorganized players at a regional level may not comply with applicable statutory and regulatory requirements and due to which they may be able to operate at lower cost and consequently may offer lower prices than us; and
- Availability of other alternative modes of goods transportation that directly compete with our routes or geographic regions we cover.

15. We have not obtained registration under shops and establishment regulation for our commercial spaces / branch offices in the concerned states of India.

We operate our business through various commercial spaces / branch offices throughout India. Most of these commercial spaces / branch offices are required to be registered under the shops and establishment regulation of the concerned state. However, we have not obtained such registrations under the shop and establishment regulation and thus, we may be subject to certain actions and / or penalties by the regulatory authority.

16. Our Company had negative cash flow in the last financial year, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial year and which could affect our business and growth:

(Rs.in lakh)

Particulars	For 6 months ending Sept. 2017	For the Financial Year ended March 31		
		2017	2016	2015
Net Cash Flow from/(used in) Operating Activities	(47.95)	763.55	557.82	664.23
Net Cash Flow from/(used in) Investing Activities	(72.41)	(717.57)	(649.98)	(101.51)
Net Cash Flow from/(used in) Financing Activities	289.62	(113.17)	207.45	(535.36)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Our Company had negative cash flow as of March 31, 2017. The same was majorly due to cash outflow in investing activities as we made addition to our current fleet which is our key resource and asset. The same was done to equip ourselves for future growth.

However, if our Company is still not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

17. Our indebtedness and the conditions and restrictions imposed by our financing arrangements could adversely affect our ability to conduct our business and operations.

Pursuant to the financing arrangement by us with the bankers, we are required to obtain consents from the respective bankers to undertake certain actions. Some of these agreements contain restrictive covenants, including, but not limited to, requirements that we obtain written consent from lenders prior to issuing new shares, incurring further debt, creating further encumbrances on our assets, effecting any scheme of expansion/business,.. Although we have generally not encountered difficulties in obtaining consent from the financial institutions for desired actions in the past, There can be no assurance that we will be able to comply with these covenants or that we will be able to obtain the consents necessary to take the actions we believe are required to operate and grow our business.no assurance can be given that such consent will be granted in the future.

18. Our Company has incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

As on September 30, 2017, we had Rs.3342.94 lakh of outstanding debt in terms of long term borrowings and short term borrowings on our balance sheet (including current maturities but excluding non-fund based facilities) from various banks, financial institutions and others. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet such obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds.

For further details on our outstanding debt please refer chapter titled "*Financial Indebtedness*" on page 147

19. Our Company has unsecured loans, which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our business operations and financial condition of Company.

Our Company has availed unsecured loans from promoters & their relatives and other corporates that are repayable on demand to the relevant lender and may be recalled by the relevant lender at any time. Any such

unexpected demands or accelerated payment may have a material adverse effect on the business of, cash flow and financial conditions of the Company. For further information on the Financial Indebtedness please refer to the heading titled "Financial Indebtedness" in the chapter titled "Financial Statements as Restated" beginning on page 122 of this Prospectus.

20. Contingent liabilities could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.

As of September 30, 2017, our contingent liabilities as indicated in our Restated Financial Statements and also certified by our statutory auditors were as follows:

Sr. No.	Particulars	Remarks
1.	<i>Guarantees issued by the Company's Banker on behalf of the company</i>	<i>Bank Guarantees outstanding as on 30/09/2017 is of Rs 394.17 lakh</i>

In the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future.

21. Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them.

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise, which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to the chapter "Our Management" on page 101 of this Prospectus. The loss of such key members of our management team and the failure of any succession plans to replace such key members could seriously impair the ability to continue to manage and expand the business efficiently.

22. We have issued Equity Shares during the last one year at a price that may be below the Issue Price.

During the last one year we have issued Equity Shares at a price that is lower than the Issue Price as detailed in the following table:

Date of allotment	Number of Equity Shares	Face value(Rs.)	Issue Price (Rs.)	Nature of Consideration	Nature of allotment
10/02/2018	13,794,480	10.00	Nil	Other than Cash	Bonus in the ratio of 8 Equity Shares for every 1 Equity Share

For details of the Allottees, please refer "Capital Structure" on page 47 of this Prospectus.

23. Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures, lender's approvals and other factors.

Our Company has not paid dividends in the past financial years. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, lender's approvals and other factors. There can be no assurance that we will have distributable funds or that we will declare dividends in the future.

- 24. Our IT systems provide us connectivity across our business functions through our software, hardware and network systems. Any failure in our IT systems or loss of connectivity or any loss of data arising from such failure can adversely impact our operations/service levels.**

Failure of our IT systems could disrupt our ability to track and trace our consignments. Computer viruses could cause an interruption to the availability of our systems. Unauthorized access to our systems with malicious intent could result in the theft of proprietary information and in systems outages. An unplanned systems outage or unauthorized access to our systems could materially and adversely affect our business.

- 25. Trade Receivables form a substantial part of our current assets. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.**

We are engaged in goods transportation service for diversified customers. Our business is working capital intensive and hence, trade receivables form a substantial part of our current assets thereby effecting our complete cycle completely. The results of operations of our business are dependent on our ability to effectively manage our trade receivables and receiving their payments on time.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

- 26. Any customer dispute regarding our performance or workmanship may amount in delay or withholding of payment to us and may adversely affect our business.**

Our Company provides logistics services to our customer according to their requirement. As transportation service providers, our primary competence is the ability to provide timely deliveries and services, further being able to exploit the benefits of economies of scale and credit shortage in the industry. In case that our service of transportation does not fulfill the requirements of our customer which may leads to dissatisfaction and further consequence including customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in materially affecting our business.

- 27. Our Promoters and certain of our Directors hold Equity Shares in our Company and are therefore interested in our performance in addition to their remuneration and reimbursement of expenses.**

Certain of our Directors including our Promoters are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the sections titled “Related Party Transactions” on page 120 of this *Prospectus*.

- 28. We have in past entered into related party transaction and may continue to do so in the future, may potentially involve conflicts of interest and impose certain liabilities on our Company.**

We have entered into related party transactions with our Promoters, Promoter Group, Group Entities and Directors. While we believe that all such transactions have been conducted on the arm’s length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the

future. For details of these transactions, please refer to section titled "*Related Party Transactions*" at page 120 of this *Prospectus*.

29. A qualification has been noted by Peer Review Auditors in their report on the Restated Financial Statement.

Our Peer Review Auditors have provided a qualification in their report on Restated Financial Statement in relation to unsecured loans/deposits taken by the company from other than directors which is contravention of Companies Act-2013, however same have been repaid and as on date there is no such unsecured loan outstanding.

30. *There may be potential conflicts of interest if our Promoters or Directors are involved in any business activities that compete with or are in the same line of activity as our business operations.*

Our Group Entity M/s Jai Durga Logistic is involve in similar line of business. Further, we have not entered into any non-compete agreement with our said entities. We cannot assure you that our Promoter who has common interest in said entity will not favour the interest of the said entities As a result; conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Entities in circumstances where our respective interests diverge. There can be no assurance that our Promoters or our Group Entities or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations

31. *Changes in existing emission and vehicle age norms may lead to part or all of our fleet of vehicles becoming un-roadworthy.*

Any change in the existing norms for vehicle emissions and /or age of vehicles, including implementation of more stringent Bharat Stage VI emission norms or a restriction on the use of commercial vehicles above the age of certain years, including pursuant to judicial rulings, revised legislations and international treaties, such as the United Nations Framework Convention on Climate Change, to which India is a signatory, may require us to comply with such stringent norms.

Bharat Stage (BS) III &IV norms have been enforced across the country. In 2016, the Indian government announced that the country would skip the BS-V norms altogether and adopt for the BS-VI norms by April 2020. Further implementation of such higher norms, may lead to some or all of our fleet of vehicles being declared unfit. There can be no assurance that our vehicles will be able to meet such emission compliance norms partially or at all. Failure to meet such emission norms may cause us to incur substantial costs in replacement and upgrading of our fleet of vehicles, which may have a material adverse effect on our business and results of operations. Upgradation/replacement of the existing fleet of vehicles to cater to the stringent norms may add to our capital cost which may have a material adverse effect on our business and results of operations and financial performance.

32. *Our Directors have extended personal guarantees in connection with some of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in future or can be called at any time, affecting the financial arrangements.*

Our Directors have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, the financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

33. *We have not identified any alternate source of raising the funds mentioned as our 'Objects of the Issue'. Any shortfall or delay in raising / meeting the same could adversely affect our growth plans, operations*

and financial performance.

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for working capital cycle or may result in us borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company.

34. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

35. We are significantly dependent on vehicles hired by us for providing transportation services to our customer. Any disruptions in hiring vehicles or any misconduct from their staff will affect our customer base and financial position of our Company.

Currently we have 93 vehicles which contribute approximately 8-10% of total revenue and remaining of the turnover is booked through hired vehicles. Thus our Company is dependent on hiring of additional trucks from third parties because of various factors like volume of orders and tight delivery schedules, nature of goods to be transported and customers preference. This involves risk as availability of third-party vehicles may be uncertain during periods of high demand. In addition, we do not have any control over the servicing and maintenance of these vehicles. Any non-availability of hired trucks or other vehicles, delay in obtaining them and/ or break down, on-road repairs or service interruptions, any misconduct from their staff may result in loss of orders, delays in delivery of goods which could lead to customer dissatisfaction and loss of business, which in turn could adversely affect our business, results of operations and financial condition. Although our company has multiple third-party vehicle suppliers and have long term relationship with them and have not faced any major loss in past due to non-availability of hired vehicles, we cannot assure you that this will have no adverse impact in future.

36. We have applied for registration of our name and logo but do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.

We have applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the trademark as on date. The application is currently pending before the Registrar of Trademarks. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. For further details, please refer to the chapter titled "Government and Other Approvals" on page 161 of this Prospectus.

37. Any performance guarantee provided by us and any breach of that guarantee could adversely affect our operations and growth prospects.

Performance guarantee is a business agreement between a customer and a contractor for the contractor to perform all of their obligations under the contract. A performance guarantee might also include a clause to protect the customer against losses incurred in case we fail to perform and if an enforcement action is required as per our performance guarantee, then it could adversely affect our operations and growth prospects.

B. Issue Related Risk

38. Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.

Our Promoters and Promoter Group may beneficially own 63.26% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors and on various other matters. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

39. Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

40. The deployment of the Issue Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Issue Proceeds from the Fresh Issue.

Our Company intends to primarily use the Issue Proceeds from the Fresh Issue towards Working Capital requirement as described in "Objects of the Issue" on page 70 of this Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of Rs. 500 crores. The management of our Company will have discretion to use the Issue Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Issue Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Issue Proceeds from the Fresh Issue to achieve profitable growth in its business. Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI. Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Issue Proceeds. If we are unable to enter into arrangements for utilization of Issue proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

41. There is no existing market for our Equity Shares, and we cannot be sure if one will develop. Thus a risk of loss in the investment is there.

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- a. Volatility in the Indian and other Global Securities Markets;
- b. The performance of the Indian and Global Economy;
- c. Risks relating to our business and industry, including those discussed in this Prospectus;
- d. Strategic actions by us or our competitors;
- e. Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- f. Adverse media reports about us, our shareholders or Group Companies;
- g. Future sales of the Equity Shares;
- h. Variations in our quarterly results of operations;
- i. Differences between our actual financial and operating results and those expected by investors and analysts;
- j. Our future expansion plans;
- k. Perceptions about our future performance or the performance of transport sector companies generally;
- l. Performance of our competitors in the Transportation service industry and the perception in the market about investments in the Transportation service sector;
- m. Significant developments in the regulation of the Transportation industry in our key locations;
- n. Changes in the estimates of our performance or recommendations by financial analysts;
- o. Significant developments in India's economic liberalization and deregulation policies; and
- p. Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

42. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

43. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations (Finance bill 2018), capital gains arising from the sale of equity shares in an Indian company are taxable in India with effect from April 1, 2018. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will also be subject to capital gains tax at the rate of 10% in India if LTCG of an individual exceeds Rs. 1 Lakh per annum in one fiscal as per specified conditions. The Central Government has rolled back the exemptions on long term capital gains for investors holding listed securities. Further, any gain realized on the sale of listed equity shares held for a period of 12

months or less will be subject to short term capital gains tax at the rate of 15% in India. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

External Risk Factors

44. Our performance is linked to the stability of policies and the political situation in India.

The Central and State Governments serve multiple roles in the Indian economy, including as producers, consumers and regulators, which have significant influence on the logistics industry and us. The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations.

Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation.

45. Our business is dependent on economic growth in India.

The development of the logistics industry is parallel to the economic growth of the country as it comprises of inbound as well as outbound movement of the agricultural, manufacturing and service supply chains. Our performance is thus dependent on the health of the overall Indian economy.. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

46. The operations and performance of our industry and company are heavily dependent on the physical infrastructure. Any deterioration in the quality of the same could adversely affect our results of operations and financial condition.

The quality of the operations of our company are linked to the India's physical infrastructure, i.e. road, rail and port network, electricity grid and communication systems. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

47. Factors like civil unrest, terrorist attacks, communal disturbance or natural calamities can affect our business performance and financial condition and would affect the price of our equity share.

Factors like civil unrest, terrorist attacks, communal disturbance or natural can effect/prevent us from timely delivery of our consignments and discharging our obligations towards the contracts entered with our customers, thereby affecting our business performance and financial condition and profitability. Although we control the damage by entering into Force Majeure clause in the contracts with some of our customers, the risk of loss of revenue due to these external factors is there.

48. Factors like war at international borders, civil unrest, terrorist attacks or communal disturbance could adversely affect the financial markets domestically as well as globally, affecting the price of our equity share.

Any major hostilities at international borders involving India or other prominent world countries, or other act of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and national as well international equity markets. These may induce high volatility on share prices and could adversely impact the price of our equity share.

49. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, financial condition, results of operations and prospects.

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page 91 of this Prospectus. The Government of India or state governments may introduce new laws, regulations and policies applicable to us, our business and industry. These may require us to obtain additional approvals and licenses or impose onerous requirements on our business. These changes may be unfavourable to us and may have negative impact on our business and financial performance.

The Government of India has enacted the Central Goods and Services Tax Act, 2017 to lay a framework for a comprehensive national goods and services tax ("GST") regime that has combined taxes and levies by the Central and State Governments into a unified rate structure. The said legislation was notified and made effective from July 1, 2017. Previously we were registered under Service tax in that situation our service was liable for service tax but as per GST Act, 2017 liability for payment of GST is on Consignee hence we have surrendered the GST Registration. As per the Reverse Charge Mechanism for GST supply of GTA Services would be covered under 100% Reverse Charge Mechanism for Entity holding the GST Registration Certificate and the entity availing this service has to pay the GST on the service. We cannot assure you that our cash flows and results of operations will not be affected by the new tax regime.

The impact of any future changes to Indian legislation on our business cannot be fully determined at this time. Additionally, our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules taxation policies and regulations applicable to us and our business. Such unfavourable changes could decrease demand for our services and products, increase costs and/or subject us to additional liabilities. Any such changes could have an adverse effect on our business and financial results.

50. The transition to Ind AS and the ICDS in India is very recent. Although we have transitioned to Ind AS ,there is insufficient clarity on the impact of such transition on our Company in future financial periods.

The transition to Ind AS from GAAP and IFRS in India is very recent. There is not yet a significant body of established practice such as interpretations of the new accounting standards on which to draw in forming judgments regarding the new system's implementation and application. As a result, although we have transitioned to Ind AS, there is insufficient clarity on the impact that such transition will have on us and our financial reporting policies and practices. We cannot assure you that there will not be further changes in the manner in which we apply our accounting policies or in the preparation and presentation of our financial statements in the future. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. We may encounter further difficulties in the ongoing process of implementing and enhancing our management information systems under Ind AS reporting.

51. Any probable downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's share price.

Any probable adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect the Indian Economy and could have a material adverse impact on the Indian securities market including our Equity Shares.

52. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to

attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

SECTION III – INTRODUCTION SUMMARY OF OUR INDUSTRY

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the Issue has independently verified the information provided in this section. Logistics comprises of both infrastructure like roads, ports, railways, air on one hand and services like transportation, warehousing, logistics service provider firms etc. which are all equally important. Road transport in India is the dominant mode of transport, accounting for 70% of freight movement.* India has the second largest road network across the world at 5.4 million km. Road transportation has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country. In India sales of automobiles and movement of freight by roads is growing at a rapid rate. Over the last decade, the numbers of LMVs and heavy vehicles have increased at about 9% and 7.6%, respectively.* As per the Economic Survey of 2017-18, the number of registered goods vehicle is projected to grow 10496 thousand in 2015-16 from 9344 thousand in 2014-15.**

India's position witnessed rise to the 35th position in 2016 from the 54th position in 2014 as per the World Bank Logistics Performance Index (LPI)^. Still a lot is needed to be done. Internationally, a goods vehicle travels an average of 600–800 km a day, while on Indian roads, until recently, the average distance covered was only 250–300 kms a day.* The lead time for export/import is also very high in India. Also, the cost of Logistics in India is very high at 14% of GDP in contrast to the global average of 8% of GDP..^^

The transport infrastructure sector in India is expected to grow at 6.1 per cent in real terms in 2017 and at a Compounded Annual Growth Rate (CAGR) of 5.9 per cent through the year 2021, thereby becoming the fastest-expanding component of the country's infrastructure sector.

The Union Minister of State for Road, Transport and Shipping has stated that the Government aims to boost corporate investment in roads and shipping sector, along with introducing business-friendly strategies that will balance profitability with effective project execution. Various initiatives have been taken by the government in this regard:

The Logistics Sector has been granted Infrastructure status. It will enable the Logistics Sector to avail infrastructure lending at easier terms with enhanced limits, access to larger amounts of funds as External Commercial Borrowings (ECB), access to longer tenor funds from insurance companies and pension funds and be eligible to borrow from India Infrastructure Financing Company Limited (IIFCL).

The Central government budget 2018 (The Finance Bill) saw the transport sector getting an all-time-high allocation of Rs 1,34,572 crores. Govt. has also showing confidence in the recently approved 'Bharatmala Pariyojana', reiterating the aim to develop about 35,000 kilometers of highways at a cost of Rs. 5,35,000 crores in Phase I.

The government has also enhanced allocation for the Infrastructure Sector, recognizing its role as the growth driver of the economy.

Department of Commerce will be developing a National Logistics Portal as a single window online market place to link all stakeholders.

The government, through a series of initiatives, is working on policies to attract significant investor interest. The Indian government plans to develop a total of 66,117 km of roads under different programmes such as National

Highways Development Project (NHDP), Special Accelerated Road Development Programme in North East (SARDP-NE) and Left Wing Extremism (LWE). The government has identified development of 2,000 km of coastal roads to improve the connectivity between ports and remote villages.

The National Highways Authority of India (NHAI) plans to build 50,000 km of roads by 2022 as part of a long-term goal of doubling the length of the national highway network to 200,000 km.

The Government of India has decided to invest Rs 7 trillion for construction of new roads and highways over the next five years.

In the wake of globalization, the importance of logistics is increasing as more and more, both national and multi-national companies are sourcing, manufacturing and distributing their products and services on a global scale. Thus, the recognition of performance of logistics industry would become prime importance of economic development for India in long term. Favorable government trade policies have resulted in an increased demand for logistics services to keep pace with the increased logistics needs of importers and exporters which provides opportunity for expansion to the existing vendors.

Details of the objects of the Issue

1. Funding of working capital requirements of the Company

We operate as a pan-India surface logistics mainly providing Full Truck load Transport Services. Our operational infrastructure for the goods transportation business has a growing network of branches spread across the various regions of the country, which serves as strategic transshipments hubs for our operations. We operate different types of trucks on the basis of design and size along with varying capacities.

Due to intense competition in this industry, from the organized as well from the unorganized sector, we cannot always dictate payment terms with our customers and suppliers. Also, many of our customers are big corporate houses. Thus, our current credit period is very considerably high and not uniform for different customers. Further, recent volatility in the global economy and the subsequent volatility of economic activity in India, various companies for which we transport goods and cargo, have been facing liquidity pressures and if the same were to continue we may not be able to reduce the credit period to our customers substantially in order to reduce our working capital gap. This is one of the main reasons for increase in our working capital requirements.

SECTION IV: ABOUT OUR COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the Issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Introduction

Logistics organizes the movement of goods through a network of activities and services operating at global, regional, and local scale. Logistics performance both in international trade and domestically is central to the economic growth and competitiveness of countries, and the logistics sector is now recognized as one of the core pillars of economic development. Efficient logistics connects people and firms to markets and opportunities and helps achieve higher levels of productivity and welfare. The performance and reliability of supply chains depend on an array of interventions, ranging from trade facilitation at the border to infrastructure and regulations and to urban planning and skills. Empirical evidence confirms that logistics- and connectivity-related interventions have the highest potential to reduce the cost of trade and to boost integration in global value chains.

Current Scenario of the Road Transport Industry

Logistics comprises of both infrastructure like roads, ports, railways, air on one hand and services like transportation, warehousing, logistics service provider firms etc. which are all equally important. Road transport in India is the dominant mode of transport, accounting for 70% of freight movement.* India has the second largest road network across the world at 5.4 million km. This road network transports more than 60 per cent of all goods in the country and 85 per cent of India's total passenger traffic. Road transportation has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country. In India sales of automobiles and movement of freight by roads is growing at a rapid rate. Over the last decade, the numbers of LMVs and heavy vehicles have increased at about 9% and 7.6%, respectively.* As per the Economic Survey of 2017-18, the number of registered goods vehicle is projected to grow 10496 thousand in 2015-16 from 9344 thousand in 2014-15.** Also, India's position witnessed rise to the 35th position in 2016 from the 54th position in 2014 as per the World Bank Logistics Performance Index (LPI)^. Still a lot is needed to be done. Internationally, a goods vehicle travels an average of 600–800 km a day, while on Indian roads, until recently, the average distance covered was only 250–300 kms a day.* The lead time for export/import is also very high in India. Also, the cost of Logistics in India is very high at 14% of GDP in contrast to the global average of 8% of GDP..^^

Road Ahead

The government, through a series of initiatives, is working on policies to attract significant investor interest. The Indian government plans to develop a total of 66,117 km of roads under different programmes such as National Highways Development Project (NHDP), Special Accelerated Road Development Programme in North East (SARDP-NE) and Left Wing Extremism (LWE). The government has identified development of 2,000 km of coastal roads to improve the connectivity between ports and remote villages.

The Government of India has decided to invest Rs 7 trillion for construction of new roads and highways over the next five years.

In the wake of globalization, the importance of logistics is increasing as more and more, both national and multi-national companies are sourcing, manufacturing and distributing their products and services on a global scale. Thus, the recognition of performance of logistics industry would become prime importance of economic development for India in long term. Favorable government trade policies have resulted in an increased demand for logistics services to keep pace with the increased logistics needs of importers and exporters which provides opportunity for expansion to the existing vendors.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated primarily through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017 has notified the specific ministries handling relevant sectors.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP, issued the consolidated FDI Policy circular of 2017 (“FDI Policy”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, OCBs cannot participate in the Issue.
