### OVERVIEW OF BUSINESS

Our company specializes in the manufacturing of pesticide formulations and supply bulk formulations catering to both Indian agrochemical companies, as well as multinational corporations (MNCs). We began our journey by focusing on import and registration of vital pesticide molecules (Technical) that were not produced domestically in India. We imported these molecules after lot of product research and worked on registering them with the Central Insecticides Board and Registration Committee (CIBRC) under the Department of Agriculture, Government of India. After successful registration we marketed these molecules both as technical and as value added end use formulations for both domestic manufacturers and MNCs.

For details, please refer “Our Business” beginning on page 123 of this Draft Red Herring Prospectus.

### OVERVIEW OF INDUSTRY

India is among the top five global producers of agrochemicals, playing a vital role in crop protection. The industry has expanded rapidly, growing at a CAGR of 13.3% from USD 814 million in 2019 to USD 1,342 million in 2023, and is projected to grow at 7.6% CAGR from 2023 to 2029. Pesticide production grew at a CAGR of 4.5%, reaching 258 thousand tonnes in 2022-23. India is a net exporter of pesticides, with exports increasing at a CAGR of 8.1% from 2018-19 to 2022-23, surpassing domestic consumption. The total export value reached Rs. 43,223 crore (US\$ 5.50 billion) in 2022-23. Despite strong exports, India imports pesticides, primarily from China, which accounted for 51.97% of total imports in 2022-23. The agrochemical sector includes insecticides, herbicides, fungicides, and biopesticides, with herbicides dominating global crop protection. Due to advanced formulations, India's chemical pesticide consumption declined at a CAGR of 3.2% from 2018-19 to 2022-23.

Industry growth is driven by rising agricultural output, population growth, government initiatives, and increased awareness of biopesticides. Government support includes organic farming promotion and financial aid for farmers. With increasing global demand and the “Make in India” push, the industry is set for continued expansion. Strengthening domestic production and reducing import dependence remain key priorities for India's agrochemical sector.

### Risks Relating to our Business and Industry

- Our top ten customers constituted 79.18%, 83.14%, 71.12% and 73.09% of our sales for the period ended September 30, 2024 and for the financial year ended March 31, 2024, March 31, 2023, March 31, 2022 respectively. Absence of large number of customers, dependence on few customers and creating a customer concentration risk which may have an adverse impact on our business operations and financial performance.**

Our revenues from our top ten customers for the period ended on September 30, 2024 and for the financial year ended March 31, 2024, March 31, 2023, March 31, 2022 are set out below:

(Amount in Lakhs)

Customer	For the period ended on September 30, 2024		For the financial year ended					
			March 31, 2024		March 31, 2023		March 31, 2022	
	Amount	% to total Sales	Amount	% to total Sales	Amount	% to total Sales	Amount	% to total Sales
Top ten customer	11,577.92	79.18	13,432.23	83.14	9,748.28	71.12	6,571.31	73.09

Absence of large number of customers and reliance on smaller customers base for our business may generally involve several risks. These risks may include, but are not limited to, reduction, delay or cancellation of orders, failure to negotiate favourable terms with customer, the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company. Further, there is no guarantee that we will retain the business of our existing customers or maintain the current level of business with each of these customers. Consequently, the loss of existing customers and our inability to acquire new customers, may significantly affect our revenues. As a consequence of our reliance on few customers, any adverse change in the financial condition of these customers may also have an adverse effect on our business, financial condition, results of operations, cash flows and future benefits. Furthermore, we typically do not have firm commitment in the form of long-term supply agreements with our customers and instead rely on purchase orders to govern the volume and other terms of our sales of products. Consequently, there is no commitment on the part of our customers to continue to place new purchase orders with us and as a result, our cash flow and consequent revenue may fluctuate significantly from time to time. Further, we may not find other customers for the surplus or excess capacity, in which case we may be forced to incur loss.

2. ***Our Company has not entered into long-term agreements with our customers for purchasing our products nor for the supply of raw materials with our suppliers. We are subject to uncertainties in demand/supply and there is no assurance that these customers and suppliers will continue to purchase our products or sell raw materials to us or that they will not scale down their orders. This could impact the business and financial performance of our Company.***

Our company has maintained relationships with most of our customers for several years which enables us to get repeat orders from our customers, but we have not entered into any long-term agreements with them given the nature of our business. Similarly, we purchase raw materials from a variety of domestic and international suppliers, but have not entered into any long-term contracts and hence aligned with the customer demand. Instead, we place orders based on the prevailing demand-supply situation, which is a common industry practice. As a result, both our customers and suppliers have the flexibility to terminate their relationships with us at any time due to changes in preferences or other reasons. This could significantly impact our business. Consequently, our revenue is susceptible to fluctuations in demand for our products and the supply of raw materials. Our customers are not obligated to place orders with us and may choose to cancel, reduce, or delay their orders based on factors such as, changes in demand, and their own inventory management. Similarly, our suppliers are not obligated to accept our orders and may cancel, reduce, or delay them due to factors such as demand fluctuations, their inventory management, and pricing changes.

Although, we have a strong emphasis on quality, timely delivery of our products and raw materials and close interaction by the senior management with the customers and suppliers, any change in the buying pattern of buyers and preferences of suppliers can adversely affect the business and the profitability of our Company.

3. ***Raw materials constitute a significant percentage of our Company's total expenses. Any increase in prices and any decrease in the supply would materially adversely affect our Company's business.***

Raw materials constitute a significant percentage of the total expenses of our Company. The cost of materials purchased domestically and internationally, in value and percentage terms to total revenue of the Company for the period ended September 30, 2024 and for the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 is set out below:

*(Amount in Lakhs)*

Particulars	For the period ended on September 30, 2024		For the financial year ended					
			March 31, 2024		March 31, 2023		March 31, 2022	
	Amount	% to total sales	Amount	% to total sales	Amount	% to total sales	Amount	% to total sales
Domestic	4,371.96	29.90%	5,079.95	31.44%	3,071.17	22.40%	2,997.77	33.34%
Imported	8,608.91	58.87%	7,888.39	48.82%	9,829.43	71.71%	4,282.42	47.63%
<b>Total</b>	<b>12,980.87</b>	<b>88.77%</b>	<b>12,968.34</b>	<b>80.26%</b>	<b>12,900.60</b>	<b>94.11%</b>	<b>7,280.19</b>	<b>80.97%</b>

Any increase in raw material prices that our company cannot pass on to customers could have a significant negative impact on our business. We face price risks related to the purchase of raw materials, which constitute a major portion of our expenses. Since we have not established any long-term agreements with our suppliers, we place orders based on demand estimates and current orders. Fluctuations in raw material prices and availability may affect our business and operational performance. Additionally, we do not currently engage in hedging activities to mitigate commodity price risk. Any significant change in price or disruption in the supply of raw materials, whether domestic or international, or a decline in their quality due to natural events or other factors, could lead to higher production costs that we may not be able to pass on to customers, which would adversely affect our business.

4. ***We are required to obtain and/or renew certain registrations from the CIB&RC for our products manufactured in India. We also register our products in overseas jurisdictions through our International Distribution Partners to enable exports to such countries. Any failure to successfully register our products in India or in the international markets may affect our results of operations and financial condition.***

Our products must receive requisite regulatory registrations after being tested for their safety, efficacy and environmental effect before they can be introduced and marketed in any jurisdiction. A submission of an application to a regulatory authority does not itself lead to a grant of such application. In India, our current principal market, the registration process for a new product is complex, lengthy and expensive. The time taken to obtain registration in India is generally from six months to five years from the date of application. This registration process increases our cost of developing new products and does not guarantee that we will be successful in selling these products after their registration is granted. Individual registration for each insecticide is required to be obtained from the CIB&RC to manufacture, export or import any insecticides in India under Section 9 of the Insecticides Act, 1968. If we are unable to successfully obtain registrations in a timely manner, we may lose the market opportunities which may result in our delay or failure to recover the costs incurred towards seeking registrations and other related activities and may adversely affect our future operations and profitability. Although, we have duly obtained registrations for manufacturing and exporting the products we manufacture and distribute in India and in the international markets, there can be no assurance that we will be able to maintain or obtain the necessary registrations in the

future. Additionally, after a period of time, we are required to re-register our products by illustrating to the relevant authorities that our products meet the current relevant standards, which may have become more stringent since we obtained the prior registration. There is no assurance that such re-registration would be granted.

Additionally, our products must be registered in the relevant country in which the product is marketed and sold which is applied by our International Distribution Partners in the relevant overseas jurisdiction. Each applicable authority may impose its own requirements and/or delay or refuse to grant registration, even when a product has already been approved in another country. Even after we obtain all the requisite regulatory or governmental pre-approvals and registrations, our products may be subject to other continual governmental oversight in connection with, among other things, quality control. Our pesticides manufactured in India are subject to surprise sample checking by governmental agencies and in the event that the sample does not comply with the quality norms prescribed by the CIBRC, it could lead to the issuance of show cause notices and potentially suspension of sales of those batches and/or products or even a total ban on the sale of such products. Any ban in the future on our products from manufacturing and sale in India could adversely affect our ability to manufacture some of our products which could adversely affect our financial results.

**6. *We are party to certain litigation and claims. These legal proceedings are pending at different levels of adjudication before various forums and regulatory authorities. We may be required to devote management and financial resources in the defence or prosecution of such legal proceedings. Should any new developments arise, including a change in Indian laws or rulings against us by the appellate courts or tribunals, we may face losses, and we may have to make further provisions in our financial statements, which could increase our expenses and liabilities. Decisions in such proceedings, adverse to our interests, may have an adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure you that similar proceedings will not be initiated in the future. Any adverse order or direction in these cases by the concerned authorities, even though not quantifiable, may have an adverse effect on our reputation, brand, business, results of operations, and financial condition. For further details, please refer to “Outstanding Litigation and Material Developments” beginning on page 252 of this Draft Red Herring Prospectus.

#### **7. Risk of Discrepancy in TDS Remittance and Website Reflection**

Our Company has remitted the tax deducted at source (TDS) as required by law; however, the payment has not yet been reflected on the TRACES Portal. If not rectified promptly, it may result in the perception of non-compliance, which could adversely impact our financial standing, reputation, and relationships with regulatory authorities

#### **8. We may not be able to avail funding from banks or financial institution for our future working capital requirements. The failure to obtain such financing may adversely affect our ability to grow and our future profitability.**

Our estimated working capital requirement for FY 2026 is ₹ 12,890.99 Lakhs. Of this ₹ 1,800 Lakhs will be funded through the Issue Proceeds, while any remaining amount will be sourced from our internal accruals/net worth and/or borrowings. However, our company cannot guarantee that we will be able to secure the required financing on acceptable terms in a timely manner or at all. If we are unable to renew existing funding or obtain financing on favourable terms and in a timely manner, it could significantly have a material adverse effect on our business, financial condition, and operational results.

#### **9. The Objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled “Objects of the Offer”. Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.**

Our funding requirements and the deployment of the proceeds of the offer are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time

to time and consequently our funding requirements may also change. Our estimates may exceed the value that would have been determined by third party appraisals and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of the offer is entirely at the discretion of our management. However, our Board will monitor the utilisation of the net proceeds through its Audit Committee and our Company will disclose the utilisation of net proceeds under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilized. Our Company will issue a disclosure to the Stock Exchange, on a half yearly basis, deviations, if any, in the use of proceeds of the offer from the Objects stated in the Draft Red Herring Prospectus or by way of an explanatory statement to the notice for a general meeting.

**10. Our Company had negative cash flows, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.**

(Rs. In Lakhs)

The cash flows of a company are a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details please refer to the section titled "**Restated Financial Information**" beginning on page 178 of the Draft Red Herring Prospectus.

**12. Our operations are subject to environmental and workers' health and safety laws and regulations. We may have to incur material costs to comply with these regulations or suffer material liabilities or damages in the event of an incidence or non-compliance of environmental laws and regulations which may have a material adverse effect on our business, financial condition and results of operations.**

Our operations are subject to extensive environmental and hazardous waste management laws and regulations in India, including the Environmental Protection Act, 1986, as amended (the "Environment Act"), the Air (Prevention and Control of Pollution) Act, 1981, as amended (the "Air Act"), the Water (Prevention and Control of Pollution) Act, 1974, as amended (the "Water Act") and various statutory and regulatory authorities and agencies in India. The agrochemical industry is subject to strict regulations with respect to a range of environmental matters including limitations on licensing requirements, management of materials used in manufacturing activities, the storage of inflammable and hazardous substances and associated risks, the storage, treatment and disposal of wastes, remediation of contaminated soil and groundwater, air quality standards, water pollution and discharge of hazardous materials into the environment. The discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liabilities towards the government and third parties, and may result in our incurring costs to remedy any such discharge or emissions.

The impact of these laws and regulations, or any changes to such laws or regulations, may be significant and may delay in the commencement of, or cause interruptions to, our operations. Although the company has complied with necessary

regulations and has had no reported violations to date, it is essential to ensure strict adherence to these regulations in the future. Any failure to comply may result in severe actions by regulatory authorities against the company.

***13. Any failure or Our inability to acquire, develop or protect our branded formulations, or defend successfully against claims asserting that we have infringed the IPRs of third parties may adversely affect our business, financial condition and results of operations.***

Our intellectual property rights (IPRs) primarily include our branded formulations, which are registered as trademarks with the Trademarks Registry in India. We have successfully registered a number of branded formulations that are key to our business. These IPRs are integral to protecting the unique identity and reputation of our products in the market. For more detailed information on our intellectual property, please refer to the section titled “Intellectual Property” under the “Our Business” section on page 123, as well as the section titled “Government and Other Approvals” beginning on page 260 of this Draft Red Herring Prospectus

***14. Sales of our products are largely influenced by factors such as overall area under cultivation, the cropping pattern adopted by the farmers in India, lack of monsoon and overall weather conditions in the country.***

Demand for our products is influenced by the cropping pattern, which can vary from year to year. Significant changes in the area under cultivation or the cropping pattern in India could affect both our sales and profitability. The demand for our products is also highly dependent on monsoon and weather conditions in India. A lack of monsoon in a given year may reduce demand for our products. Sales of agrochemical products in the Indian retail market are seasonal, with pesticide demand typically peaking during the monsoon season. Our sales are also impacted by extreme weather events such as droughts, excessive rainfall, cyclones, and other natural disasters like fires, floods, and earthquakes. The unpredictable nature of India's weather conditions, including floods, droughts, and their subsequent damage to crops, can have a more significant impact on crop production compared to other countries. Adverse weather conditions, or an inability to anticipate and prepare for them, could influence farmers' decisions on crop types and planting volumes, which may negatively affect the demand for our products and, in turn, our business, financial condition, and operational results. In some seasons, stable weather conditions may lead to a reduction in pest infestations, causing a decline in the demand for our products. Any significant changes in these factors could have an impact on our sales and profitability.

***15. Unsecured loans have been taken by our Company which can be recalled by the lenders at any time.***

The unsecured loan outstanding in the financial statement of our Company as on September 30, 2024 is Rs.1,320.78 Lakhs. The same loan can be recalled by the respective lenders at any point of time, if our Company fails in repaying the loan obtained by it, shall cause reputational loss to our Company. For details of Unsecured Loans please refer “Restated Financial Statement” beginning on page no 178 of this Draft Red Herring Prospectus.

***16. Our success largely depends upon the services of our senior management and other Key Managerial Personnel (KMP) and our ability to attract and retain them. Demand for senior management personnel in the industry is intense and our inability to attract and retain our KMP may affect the operations of our Company.***

Our Key Managerial Personnel have substantially contributed for our growth. Our success is substantially dependent on the expertise and services of our Directors and Key Managerial Personnel. They provide expertise which enables us to take well informed decisions in relation to our business and prepare our Company for future challenges. Our future performance will depend upon the continued services of these persons. Demand for senior management personnel in the industry is intense. Any failure to retain any or all of the senior management personnel, could have an adverse effect on our business and the results of our operations.

***17. The products sold by our company are subject to independent verification by government agencies through sample checks. Any non-compliance with the prescribed standards could have an adverse impact on our business.***

The quality of pesticides manufactured in India is subject to independent verification by government agencies, which conduct surprise sample checks of products and their contents. If a sample fails to meet the quality standards set by the government or if the contents do not align with the disclosures on the product packaging, it could result in the issuance of show-cause notices. Any failure in quality control or in providing the required packaging disclosures could lead to the suspension of sales of affected batches or products in certain states, or even a ban on sales of those products. Although our company has not faced any suspensions or bans on product sales in the past, such events could significantly impact our sales and revenues.

***18. We do not own our corporate office, warehouse and office-cum-godown, any revocation or adverse changes in the terms of the lease and license may have an adverse effect on our business, prospects, results of operations and financial condition.***

We do not own our corporate office, warehouse and office-cum-godown. We have entered into an rent/lease agreement for occupation of these premises. If the owner of the premises revokes these agreement or imposes unfavourable terms and

conditions, we may suffer a disruption in our operations or have to pay higher rent, which could have a material adverse effect on our business, prospects, results of operations and financial condition.

For further details, see the paragraph titled “*Property*” under the section titled “*Our Business*” beginning on page 123.

**19. *Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/ or surplus of products, which could harm our business.***

We monitor our inventory levels based on our own projections of future demand, which are primarily based on weather forecast and agriculture seasons in various regions. Due to the time required to produce commercial quantities of our products, we make production decisions well in advance of actual sales. If our demand forecasts for any product are inaccurate, it can lead to either a shortage or surplus of our products. On the other hand, an over-supply of products could lead to higher costs, negatively affect cash flow, degrade inventory quality, significantly reduce margins, and potentially cause inventory write-offs. Any of these situations could have a material adverse impact on our business, operations, and financial condition.

**20. *Fluctuations in the prices of commodities crops may affect the sales of our crop protection products and our results of operations.***

Our business is also affected by fluctuations in commodity crop prices, which can vary due to factors such as volatile weather conditions, unfavorable soil conditions, supply quality and availability, currency fluctuations, consumer demand, and changes in government policies. These price movements can impact farmers decisions on the types and quantities of crops to plant, which in turn affects the sales of our crop protection products and our operational results. When crop prices decline, our customers typically reduce their spending on agrochemical products, which could negatively affect our revenues, business, financial condition, and results of operations.

**21. *There have been some instances of delayed filing/ incorrect filings in the past with the Registrar of Companies which may attract penalties.***

Our Company has made certain inadvertent inaccuracies, delays, and non-compliances concerning regulatory filings in the past. Notices may be issued upon our Company and fines or penalties may also be imposed upon our Company, which may adversely affect our administration from compliance perspective. Till date, the Company has not received any notices from any authorities, however there can be no assurance that no penal action will be taken against us by the regulatory authorities with respect to the non-compliances. If any adverse actions are taken against us, our financial results could be affected.

Our Company identified errors in certain allotment related statutory filings and subsequently filed GNL-2 on – for correction of the defective forms

Sr.No	Description of Erroneous Form	Description of Error	Date of Correction Filing
1.	PAS-3 dated 31 <sup>st</sup> March 2016	Technical Error	17 <sup>th</sup> January 2025
2.	PAS-3 dated 24 <sup>th</sup> July 2024		06 <sup>th</sup> February 2025

As of now, our Company has rectified these errors by filing the GNL-2 form. ROC may take cognizance of the same and may impose monetary penalties as per applicable sections or initiate compounding proceedings. In case any monetary penalties are imposed on us, or any compounding proceedings are initiated against us, it will adversely affect our business operations and financial position and temper our corporate governance.

**22. *Quality concerns and negative publicity, if any, would adversely affect the value of our brand and our sales.***

Our business relies on the trust that farmers place in the quality of our products, as well as our ability to maintain and protect our brand value. Any negative publicity surrounding our company’s branded formulations or products, including issues related to a decline in product quality from our vendors or other unforeseen events, could harm our reputation, brand value, operations, and financial performance.

**23. *Our inability to respond adequately to increased competition may adversely affect our business, financial condition and results of operations.***

We face competition from several domestic companies as well as large multinational corporations that offer a broader range of products, have greater brand recognition, stronger sales forces, and more substantial financial resources and experience, including larger budgets for advertising and marketing. Additionally, we compete with new entrants, including multinational companies, which may have greater flexibility to adapt to changing business and economic conditions and possess stronger financial resources. The competition is based on factors such as pricing, innovation, perceived value, brand recognition, promotional efforts, advertising, special events, new product launches, customer service, and other activities. Growing competition could pressure us to lower our product prices, which may reduce revenues and margins, or lead to a loss of

market share, all of which could negatively affect our results of operations. Our ability to compete effectively, including responding promptly to changes in the industry and market, along with increased spending on advertising, is critical. Failure to do so could affect the competitiveness of our products and result in a decline in revenue and profitability. Therefore, there is no assurance that we will be able to compete successfully in the future against both existing and potential competitors, which could adversely impact our business, financial condition, and operational results.

**24. *We are subject to counterfeit products, which could adversely affect the reputation of our business and consequently, our business, financial condition and results of operations.***

Counterfeit products are products manufactured and sold illegally as legitimate products. In the past few years, technologies have advanced to the level that legitimate products can be counterfeited. The sale of such counterfeit products may lead to lower sales of our branded products and affect our reputation. In addition, such products may be harmful to customers or may be less effective than genuine products, which could harm our brands and reputation. The proliferation of unauthorized copies of our products, and the time spent in pursuing claims and complaints about counterfeit products may also reduce our sales and tarnish our brands and reputation, and could adversely affect our business, financial condition and results of operations.

**25. *Product innovation and research and development (R&D) activities are an integral part of our business model. If our research and product development efforts are not successful, our business may be restricted which may in turn have an adverse effect on our business and financial condition.***

Product innovation and R&D are key components of our business model. To remain successful in the future, our company must introduce new products and expand into new areas. However, our plans to launch new products may not succeed and/or get delayed. Any significant challenges related to the sale or use of our new products, failure to effectively introduce new products, or inability to execute our expansion strategies could adversely impact our business and financial condition. Additionally, new products currently under development may not meet our expectations once fully developed and tested, and we may face difficulties in producing and marketing them profitably, which could limit our growth and negatively affect our financial performance.

**26. *Lack of education and awareness among farmers in India may lead to inappropriate application of our products and adversely affect our business prospects.***

We understand the importance of educating farmers on the proper application of our pesticides to ensure their effectiveness. This includes providing information on the appropriate type of pesticide, dosage, quantity, and application frequency through our farmer training programs. However, delivering effective training may be challenging due to regional language and dialect differences, even though almost all of our products are packaged with instructions on optimal dosage and usage. Improper application of our products could lead to crop damage and other serious consequences. We cannot guarantee that such incidents will not happen or that our farmer training programs will fully prevent unsafe practices and/or be implemented by the farmers. Any misuse of our products could harm our brand reputation, future prospects, and negatively affect our business, financial condition, and operational results.

**27. *Our products may become ineffective in the long term. If any of our products become ineffective and farmers choose product of other companies, this may adversely affect our business, financial condition and results of operations.***

Empirical tests and data have consistently shown that pests can develop resistance to pesticides that are used repeatedly over time. As a result, pests may eventually develop immunity to our products. This may necessitate changes to the chemical formulation of our products and/or the development of new products, which could be less effective than our previous formulations, potentially impacting our business operations and reputation. The development and registration of new products is a lengthy process and any changes or delay could place significant strain on our financial resources.

**28. *Many of the materials produced at our factories are hazardous in nature. In the event of any accidents involving any such hazardous materials and substances, our Company may be held liable for damages and penalties which may impact the financials of our Company.***

Our employees/labour may be required to work under potentially dangerous circumstances in the operation of our business, which is subject to hazards and risks normally associated with the handling, storage, movement and production of chemical and other products, such as handling, processing, storage and transportation of hazardous materials, as well as accidents such as fire, explosions, leakage or spillages of chemicals. Any mishandling of hazardous chemicals and substances could also lead to serious and sometimes fatal accidents. These hazards can cause personal injury and loss of life, severe damage to and destruction of property and equipment, environmental damage and may result in the suspension of operations and the imposition of civil and criminal liabilities/claims of injury by employees or members of the public due to exposure, or alleged exposure, to the hazardous materials involved in our business operations may arise. which could in turn affect our financial condition and business performance.

**29. *Agrochemical is a labour intensive industry, hence we may face labour disruptions and other planned and unplanned outages that could interfere or temporarily disrupt our operations.***

Our Company's activities are labour intensive. Strikes and other labour action may have an adverse impact on our operations, though we have not experienced any such labour disruption in the past. We cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future. Also, the third-party suppliers of raw materials, which we use may experience strikes or other industrial action. Any such event could disrupt our operations either temporarily or for a significant period of time, resulting in increased wages and other costs leading to a material adverse effect on our business, costs, results of operations or financial condition.

**30. *Unfavourable global weather patterns may have an adverse effect on our export business, results of operations and financial condition.***

As we primarily serve the agriculture sector, our export business is sensitive to global weather conditions that impact crop patterns, including extreme events such as droughts and natural disasters. Growing concerns about the effects of carbon dioxide and other greenhouse gases on global temperatures, weather patterns, and the frequency and intensity of extreme weather events could further increase these risks. Adverse weather conditions can also lead to fluctuations in commodity prices, influencing growers decisions on what crops to plant and in what quantities, which could, in turn, affect the demand for our products. Therefore, any unfavourable weather patterns may negatively impact our business, operational results, and financial condition. The loss resulting from shutdown of operations at our manufacturing facility could have an adverse effect on our Company.

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents. Our manufacturing facility use equipment and machinery, and the breakdown or failure of equipment or machinery may result to make repairs or replacements which may require considerable time and expense. Although, our Company have not had such incident in the past and while we also have insurance cover for our facility, the same may not be adequate to cover the loss in business. Although we take precautions to minimise the risk of any significant operational problems at our units they could have adverse effect on our financial performance.

**31. *The installed capacity of our manufacturing facility has not been fully utilized and could limit our ability to fully absorb fixed costs.***

The installed capacity of our manufacturing facility has not been fully utilized over the past three financial years, and there is no guarantee that capacity utilization will increase in the future. If we are unable to fully utilize the installed capacity of our manufacturing facility going forward, it could impact our cost structure and profitability, potentially adversely affecting the financial health of our company. We have based our data regarding the installed capacity and capacity utilization of manufacturing facility on information provided and certified by a Kruten H Patel, chartered engineer. For more information on our production and capacity utilization, please refer to the section titled "Our Business" on page 123.

**32. *Our manufacturing facility in Dahej, Gujarat is situated on industrial land allotted to us by GIDC on a leasehold basis. Failure to comply with the conditions of use of such land could result in an adverse impact on our business and financial condition.***

Our manufacturing facility at Dahej is situated on industrial land leased to us by GIDC for a period of 99 years. As per the lease agreement between GIDC and our company, we are obligated to adhere to the terms and conditions outlined in the lease deed. If the lease deed is cancelled due to non-compliance with the lease terms or the allotment letter, it could negatively affect our financial condition and have an adverse impact on our operations and overall financial performance.

**33. *Our Company is dependent on third party transportation providers for the supply of raw materials and delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.***

Our company relies on third-party transportation providers for the supply of raw materials and the delivery of products to our customers. While we have not experienced disruptions due to transportation strikes in the past, any future strikes could negatively impact our supplies from suppliers and deliveries to customers. The current transportation facilities may not be sufficient to support our ongoing and future operations. Additionally, raw materials and products could be lost or damaged in transit due to accidents or natural disasters. Delays in the delivery of raw materials and products could also affect our business and operational results. An increase in freight costs or the unavailability of transportation services may have an adverse impact on our business and financial performance.

Furthermore, disruptions in transportation services due to weather-related issues, strikes, lockouts, inadequate road infrastructure or port facilities, or other unforeseen events could hinder the supply of raw materials to our units and the delivery of products to customers. Such disruptions could materially and negatively affect our business, financial and operational results.

**34. *We rely on our distribution network to sell our products to the farmers and any failure to effectively manage our distribution partners could hamper our business, financial and our results of operations.***

We rely to a significant extent on the relationships we have with our third-party dealers for our branded business, as they lay a significant role in enhancing customer awareness of our products and maintaining our brand names. As of September 30, 2024, we had more than three hundred (300) dealers. We may not be able to effectively manage our existing distribution network as we do not have any long-term contracts with any of our dealers. We are also exposed to the risk of our dealers failing to obtain requisite licenses and selling permissions or adhering to the standards in respect of sales and after-sales service in their direct contacts with customers, which in turn could adversely affect our customers perception of our brands and products and brand revenues. We seek to increase the penetration of our products by expanding our distributor network targeted at different customer groups and geographies. There can be no assurance that we will be able to successfully identify or appoint new dealers. If we are unable to effectively manage our distribution network, our brand business, financial and results of operations may be adversely affected.

**35. *There can be no assurance that we will in all instances be in full compliance with applicable regulations of the international markets where we export our products. Any failure to comply with applicable international regulations may adversely affect our export business, financial condition and results of operations.***

We export our products to various international markets, each governed by its own set of laws. These exports are primarily managed through our International Distribution Partners. In the event of a dispute regarding the exported products, it is likely that the exclusive jurisdiction for resolving such issues will be in the courts of those respective countries. Pursuing, enforcing, or defending claims in these foreign courts or other relevant judicial or regulatory forums can be prohibitively expensive or impractical. Any failure to adhere to the applicable international regulations could have a negative impact on our export business, financial health, and overall operations.

**36. *Our Company has incorporated a subsidiary in UAE to facilitate the exports and imports in that country. Though we have not yet infused funds in this subsidiary, if we are unable to explore new opportunities and achieve our business objectives in UAE through this subsidiary, it may affect our business prospects.***

Our Company has incorporated a subsidiary in UAE named Mahamaya Lifesciences FZE to further promote our import and export operations through this subsidiary. We have not yet invested funds in this subsidiary and we plan to commence operations through this subsidiary at an appropriate time.

**37. *We are exposed to the risks of significant breaches of data security, and malfunctions or disruptions of information technology systems.***

We increasingly depend on information technology systems and accounting system to support our business processes, including sales, order processing, production, procurement, inventory management, quality control, distribution, finance and other. Although these technology initiatives are intended to increase productivity and operating efficiencies, they may not achieve such intended results. These systems may be potentially vulnerable to data security breaches, whether by employees or others, which may result in unauthorized persons getting access to sensitive data. Such data security breaches could lead to the loss of trade secrets or other intellectual property, and the data related to our product development and other proprietary information could be compromised. These systems are also susceptible to outages due to fire, floods, power loss, telecommunications failures, natural disasters, computer viruses or malware, break-ins and similar events. Effective response to such disruptions or malfunctions will require effort and diligence on the part of our third-party distribution partners and employees to avoid any adverse effect to our information technology systems.

**39. *Our Company has in the past entered into related party transactions with our Promoters and Group Entity and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.***

Our Company has entered into related party transactions with our Promoters and Group Entity in the past. Our Company believes that all such transactions have been conducted on an arm's length basis and are accounted as per accounting standards. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

For further details, please refer to the section titled "*Restated Financial Statement –Related Party Transaction*" beginning on page 178 of the Draft Red Herring Prospectus.

**40. *Our Promoters have given personal guarantees in relation to certain debt facilities provided to us.***

Our Promoters have given personal guarantees in relation to our debt facilities. In the event our Promoters withdraw or terminate their guarantee, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition.

**41. *Our Promoters, certain of our Directors and Key Managerial Personnel have interests in us other than reimbursement of expenses incurred and normal remuneration or benefits.***

Our Promoters, certain of our Directors who are also the Key Managerial Personnel of our Company have interests in our Company to extent of Equity Shares held by them, any dividends that may be declared, bonuses or other distributions on such Equity Shares. As of the date of this Draft Red Herring Prospectus, our Promoters hold majority of the issued, subscribed and paid-up Equity Share capital of our Company. Upon completion of the Offer, our Promoters will continue to exercise significant control over us, which will enable them to vote together in capacity as shareholders of our Company on certain matters in general meetings of our Company. Accordingly, the interests of our Promoters in their capacity as shareholders of our Company may conflict with your interests and the interests of other shareholders of the Company. For further details, see "*Capital Structure*", "*Promoter and Promoter Group*" and "*Our Management*" beginning on pages 62, 173 and 158 respectively.

**42. *We have not been able to obtain certain records of the work experience of some Directors and have relied on declarations, undertakings and affidavits furnished by them.***

We have not been able to obtain certain old records of the work experience of Dr. Charudatta Digambar Mayee, Independent Director and the education qualifications of Mr. Sekhar Kavasseri Rajagopal, Independent Director of the company. We have relied on the declarations, undertakings and affidavits furnished by them for the same. For further details, please see "*Our Management*" beginning on page 158.

**43. *Our Promoters will continue to retain significant control in our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.***

After the completion of this Issue, our Promoters will continue to hold the Equity Share capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting, and our other shareholders will be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders, such as actions which delay, defer or cause a change of our control or a change in our capital structure, merger, consolidation, takeover or other business combination involving us, or which discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. If our Promoters sells a substantial number of the Equity Shares in the public market, or if there is a perception that such sale or distribution could occur, the market price of the Equity Shares could be adversely affected. No assurance can be given that such Equity Shares that are held by the Promoter will not be sold any time after the Issue, which could cause the price of the Equity Shares to decline.

**44. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and are also prohibited by the terms of our financing arrangements.***

Our Company has no record of paying dividend since last ten financial years. The amount of our future dividend payments, if any, will depend upon factors that our Board deems relevant, including among others, our results of future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

**45. *The average cost of acquisition of Equity Shares by the Promoters and Selling Shareholders could be lower than the floor price.***

The Promoters and Selling Shareholder's average cost of acquisition of Equity Shares in our Company may be lower than the Floor Price of the Price Band. For further details regarding average cost of acquisition of Equity Shares by the promoters and selling shareholders in our Company, please refer to the "Cover Page" and chapter titled "Summary of the draft offer Document" beginning on page 25 respectively.

**46. *Our insurance cover may not adequately protect us against all material hazards. We may face significant financial and operational losses if we are not able to recover our insurance claims in the event of any such untoward material hazard.***

Our operations are subject to accidents which are inherent to any manufacturing process such as risks of Burglary, fire, cargo, employee health and other. We may also be subject to product liability claims if the products that we manufacture are not in compliance with regulatory standards. Our insurance policies may not be sufficient to cover the economic loss that we may have to suffer due to an unfortunate incident. To the extent that we suffer loss or damage for events for which we are not insured or for which our insurance is inadequate, the loss would have to be borne by us, and as a result, our results of operations and financial condition could be adversely affected. For further details, please refer, to the paragraph titled 'Insurance' under chapter titled 'Our Business' beginning on page 123 of the Draft Red Herring Prospectus.

**47. *Any of our violation of the Metrology Act and the Metrology Rules may lead to fines and penalties, or seizure and forfeiture of our products which could adversely affect our business.***

Some of our products and the packaging of our products are required to comply with the standards of weight, measurement and numbers prescribed under the Metrology Act and the Metrology Rules. For details, see "Key Industrial Regulations and Policies in India" beginning on page 142. If we fail to comply with such standards, or fail to obtain a license from the respective controller as mandated under the Metrology Act, or fail to obtain the verification of weights and measures by the government approved test centers under the Metrology Act, fines and penalties may be imposed on us. In addition, there could be seizure and forfeiture of our products, which could adversely affect our operations.

**48. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our management and our Board of Directors, though it shall be monitored by our Audit Committee.***

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only if Issue size exceeds Rs. 10,000 Lakh. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

**49. *Our Company will not receive any proceeds from the Offer for Sale portion.***

This Offer includes an offer for sale of up to 5,40,000 Equity Shares aggregating up to ₹ [●] Lakhs by Selling Shareholders. The proceeds from the Offer for Sale will be paid to the Selling shareholders and our Company will not receive any such proceeds. See "Objects of the Offer" on page 76.

## **EXTERNAL RISK**

**50. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and the results of operations.***

Our business and industry are regulated by different laws, rules, and regulations framed by the central and state Governments. These regulations can be amended/ changed on short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**51. *Changing laws, rules and regulations, and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.***

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes. The Government of India implemented a comprehensive goods and service tax ("GST") regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which we believe will result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws,

or the promulgation of new laws, rules, and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Furthermore, the Finance Act, 2023 instituted a number of amendments to the existing direct and indirect tax regime which include the withdrawal of long-term capital gains exemptions on equity shares, long-term capital gains applicability in the hands of foreign institutional investors, and applicability of dividend distribution tax for certain transactions with shareholders, among others.

***52. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

***53. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the Financial Statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.***

Our Restated Financial Information for the period ended September 30, 2024 and for the financial year ended on March 31, 2024, March 31, 2023, and March 31, 2022 have been prepared and presented in conformity with Indian GAAP. Indian GAAP differs in certain significant respects from U.S. GAAP, IFRS, and other accounting principles with which prospective investors may be familiar in other countries. If our Restated Consolidated Financial Statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows, and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our Restated Consolidated Financial Statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should be limited accordingly.

***54. Our international operations are subject to many uncertainties, and we are exposed to foreign currency exchange rate fluctuations.***

We may be subject to risks inherently associated with international operations, including risks associated with foreign currency exchange rate fluctuations, which may cause volatility in our reported income, and risks associated with the application and imposition of protective legislation and regulations relating to import or export or otherwise resulting from foreign policy or the variability of foreign economic conditions.

***55. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

***56. Financial instability in Indian financial markets could adversely affect our Company's results of operations and financial condition.***

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial, and market conditions. Any financial turmoil, say in the United States of America, Europe, China, or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability, and price of its Equity Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

***57. If inflation rises in India, increased costs may result in a decline in the profits of our Company. Inflation rates in India have been volatile in recent years, and such volatility may continue in the future.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products and services. In such case, our business, results of operations, cash flows, and financial condition may be adversely affected. There can be no assurance that Indian inflation levels will not worsen in the future.

**58. *Investors may have difficulty in enforcing foreign judgments against our Company or our management.***

Our Company is a company incorporated under the laws of India. All Directors on the Board of Directors of our Company and our employees are residents of India and a substantial portion of our assets and such persons are located in India. As a result, it may not be possible for prospective investors outside India to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or would enforce foreign judgments if that court was of the view that the number of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered. Further, any judgment or award denominated in a foreign currency would be converted into Indian Rupees on the date of such judgment or award and not on the date of payment.

Recognition and enforcement of foreign judgments are provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908 ("CPC"). Section 13 of the CPC provides that a foreign judgment shall be conclusive regarding any matter directly adjudicated upon between the same parties or parties litigating under the same title, except (a) where the judgment has not been pronounced by a court of competent jurisdiction; (b) where the judgment has not been given on the merits of the case; (c) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases in which such law is applicable; (d) where the proceedings in which the judgment was obtained were opposed to natural justice; (e) where the judgment has been obtained by fraud; and (f) where the judgment sustains a claim founded on a breach of any law then in force in India. Further, India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the CPC. The CPC only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favour a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment.

**59. *Natural calamities and force majeure events may have an adverse impact on our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

**60. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after the Bid/Offer Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non - Institutional Bidders are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until the Bid/ Offer Closing Date. While we are required to complete Allotment, within six working days from the Bid/Offer Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors'

decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

**61. *A slowdown in economic growth in India or global economic instability could result in an adverse effect on our business, financial condition, and results of operations.***

We currently operate in India, which is generally viewed as a jurisdiction with a developing economy, that may not have as firmly established legal and regulatory systems as other countries and is dependent on domestic, regional, and global economic and market conditions. Our performance and growth and the market price of our Equity Shares are and will be dependent to a large extent on the overall performance of the Indian economy, the GDP growth rate in India, and the economic cycle in India. In prior periods, India experienced a slowdown in economic growth due to a variety of factors, including the COVID-19 pandemic, unsustainably high current account deficit, capital outflows and consequent exchange rate pressures. Despite the recent signs of an economic turnaround in the Indian economy, there is no assurance that growth will not slow down again or that inflation will not increase further in the future. A slowdown in the Indian economy could adversely affect our business and our customers and contractual counterparties, especially if such a slowdown were to be continued and prolonged. In periods of high rates of inflation, our operating expenses may increase, which could have an adverse effect on our cash flows and results of operations.

**62. *The outbreak and after-effects of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition, cash flows and results of operations.***

The outbreak of any severe communicable disease, as seen in the recent outbreak and aftermath of COVID19, could materially and adversely affect business sentiment and environment across industries. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration, and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. During the lockdown period in response to the COVID-19 pandemic, our Company had certain interim measures in place to ensure business and operational continuity. Our employees worked remotely. Although we continue to devote resources and management focus, there can be no assurance that these programs will operate effectively.

**63. *A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian laws.***

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that the interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our Shareholders, such a takeover may not be attempted or consummated because of SEBI (SAST) Regulations, 2011.

**64. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

**65. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in the developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems, or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could

interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

**66. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, that are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**67. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.***

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “**Industry Overview**” beginning on page 107 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**68. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under the current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. A Securities Transaction Tax (“STT”) is levied both at the time of transfer and acquisition of the equity shares (unless exempted under a prescribed notification) and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India. Such long-term capital gains exceeding ₹ 1,25,000 (Rupees One Lakh Twenty-Five Thousand) arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess). Unrealized capital gains earned on listed equity shares up to January 31, 2018, continue to be tax-exempt in such cases. Further, STT will be levied on and collected by an Indian stock exchange if the equity shares are sold on a stock exchange. Short-term capital gains, arising from the sale of such equity shares on a stock exchange would be subject to tax at the rate of 15% (plus applicable surcharge and cess). The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020, and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of the sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company's business and operations. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Additionally, the Finance Act, 2020 does not require dividend distribution tax to be payable in respect of dividends declared, distributed, or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares. Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company's business, financial condition, results of operations and cash flows.

The following table sets forth the details of the holding levels (with days rounded to the nearest) considered:

Particulars	Holding Level for year/period ended				
	Fiscal 2022 (Restated)	Fiscal 2023 (Restated)	Fiscal 2024 (Restated)	Fiscal 2025 (Estimated)	Fiscal 2026 (Projected)
	(in Days)	(in Days)	(in Days)	(in Days)	(in Days)
Inventories	76	82	113	92	78
Trade Receivables	32	25	43	59	63
Trade Payables	52	58	58	40	28

### Justification for "Holding period" levels

- Trade Receivables:** Holding the right level of trade receivables is vital for managing a company's cash flow and ensuring financial stability. The holding period of trade receivables for FY 2021-22 was 32 days which improved to 25 days in FY 2022-23. However, the holding period of trade receivables increased to 43 days in FY 2023-24. It is projected to be 59 days and 63 days for FY 2024-25 & FY 2025-26 respectively. Since our customer base consist of substantially Corporate clients, around 60 days is considered optimal. In the past holding period was lower due to limited working capital facilities. With improved profitability and cash flows we have been able to increase our credit period and get better pricing.
- Trade Payables:** Trade payables represent the amount a business owes to suppliers for goods or services received on credit, and effectively managing this balance is key to optimize cash flow. Holding the right level of trade payables is essential for managing a company's working capital and maintaining cordial supplier relationships. In FY 2021-22 the trade payables holding period was 52 days which increased to 58 days in both FY 2022-23 and FY 2023-24. It is projected that holding period will improve to 40 days and 28 days for FY 2024-25 & FY 2025-26 respectively. As mentioned above with better pricing and profitability we expect to shorten our holding period of trade payables. With improved performance we anticipate to achieve holding period of around 35 days in the future and have adequate drawing power.

3. **Inventories:** Holding the right level of inventory is crucial for maintaining smooth production operations and minimizing costs. In FY 2021-22 the inventory holding period was 76 days which rose to 82 days in FY 2022-23. However, for FY 2023-24 the holding level of Inventory increased to 113 days. It is projected that inventory holding period will improve to 92 days in FY 2024-25 and 78 days in FY 2025-26. With improved supply chain planning we expect to reduce holding period in Fiscal 2025 and Fiscal 2026. The ideal inventory holding period is approximately three months ensuring adequate stock availability for smooth production and timely supply to customers/market.

## INDUSTRY OVERVIEW

## INDIAN MACRO ECONOMY AN OVERVIEW

The Indian economy is on a strong wicket and stable footing, demonstrating resilience in the face of geopolitical challenges. The Indian economy has consolidated its post-Covid recovery with policymakers – fiscal and monetary – ensuring economic and financial stability. Nonetheless, change is the only constant for a country with high growth aspirations. For the recovery to be sustained, there has to be heavy lifting on the domestic front because the environment has become extraordinarily difficult to reach agreements on key global issues such as trade, investment and climate.

High economic growth in FY24 came on the heels of growth rates of 9.7% and 7.0%, respectively, in the previous two financial years. The headline inflation rate is largely under control, although the inflation rate of some specific food items is elevated. The trade deficit was lower in FY24 than in FY23, and the current account deficit for the year is around 0.7% of GDP. In fact, the current account registered a surplus in the last quarter of the financial year. Foreign exchange reserves are ample. Public investment has sustained capital formation in the last several years even as the private sector shed its balance sheet blues and began investing in FY22. Now, it has to receive the baton from the public sector and sustain the investment momentum in the economy. The signs are encouraging.

## Future Ahead

While contemplating the challenges that lie ahead, one should not be daunted because the social and economic transformation of democratic India is a remarkable success story. We have come a long way. The economy has grown from around USD288 billion in FY93 to USD3.6 trillion in FY23. India has generated more growth per dollar of debt than other comparable nations. Abject poverty has all but been eliminated. Human development indicators have improved, and more Indians, especially women, are getting educated. For all its flaws and warts, the system has delivered accountability through the democratic process and public discourse, where the occasional and rarer mature commentary proves effective. We should not lose sight of that.

## Global Economy

Following the onset of the Covid-19 pandemic crisis, the global economy has experienced a combination of both risks and opportunities. Progressing toward recovery, the global economy started returning to normalcy after a prolonged struggle; the governments worldwide have taken swift and appropriate measures, including widespread vaccination efforts and the consistent implementation of fiscal and monetary support strategies. Right when the economic situation seemed to be improving after the Covid-19, the Russia-Ukraine geopolitical conflict unfolded, contributing to global inflationary pressures and resulting in record-high levels not witnessed in the past four decades.

On the back of enhanced vaccination coverage and continued fiscal and monetary stimuli across countries, the GDP of the World grew by 13.2% CY 21 against a contraction of 3.0 % in CY 20. The positive trend continued into CY 22, with a growth rate of 4.7%. The global GDP is forecasted to grow from USD 101.0 trillion in CY 22 to 128.5 in CY 27, thus growing at a CAGR of 4.9% during the forecasted period. The GDP (at current price) of the major economies in the world is presented in the table below.

The world economy has experienced a contraction in GDP growth during the pandemic i.e. in CY 20. However, the governments and central banks globally have taken decisive actions by implementing fiscal and monetary stimulus measures to bolster the process of economic recovery. Further, the gradual recovery of global supply chains and increased international trade have contributed to the positive growth trajectory. These well-calibrated initiatives and the recovery to global supply-chain have been directed towards reinstating consumer and business confidence, stimulating demand, and achieving stability in financial markets. As a result of these concerted efforts, multiple countries and regions have demonstrated encouraging signs of economic revival and notable growth.

## INDIAN MACRO ECONOMY PARAMETERS

India's economy carried forward the momentum it built in FY23 into FY24 despite a gamut of global and external challenges. The focus on maintaining macroeconomic stability ensured that these challenges had minimal impact on India's economy. As a result, India's real GDP grew by 8.2 per cent in FY24, posting growth of over 7 per cent for a third consecutive year, driven by stable consumption demand and steadily improving investment demand.

The economies of India and China witnessed remarkable growth in nominal GDP during the calendar year 2021 and 2022, following the COVID-19 pandemic. India demonstrated a substantial year-on-year nominal GDP growth rate of 21.8% in CY 21 followed by a growth of 11.7% in CY 22. Meanwhile China experienced a notable growth rate of 20.4% in CY 21 and 6.2% growth in CY 22. On the other hand, major economies like the United States and Germany reported GDP growth rates of 10.4% and 10.3% respectively during CY 21 followed by 9% and 4.7% GDP growths in CY 22. Japan, however, experienced a negative growth in GDP (-2.0%) during CY 21. Nevertheless, in CY 22, Japan's GDP rebounded with a growth rate of 2%.

India ranked fifth in the world in terms of nominal gross domestic product ("GDP") for FY 22 and is the third largest economy in the world in terms of purchasing power parity ("PPP"). India is expected to be USD ~5.2 trillion economy by FY 28 and is estimated to be the third largest economy surpassing Germany and Japan.

### India's nominal GDP at current prices (In USD Tn) and GDP Growth rate (%) (FY).

Source: <https://www.indiabudget.gov.in/economicsurvey/>

India's nominal GDP has grown at a CAGR of 9.6% between FY 17 and FY 22 and is expected to continue the trend by registering an expected CAGR of 8.9% for 5-year time period from FY 23 to FY 28.

Since FY 05, the Indian economy's growth rate had been twice as that of the world economy and it is expected to sustain this growth momentum in the long term. From FY 23 to FY 28, India's nominal GDP is expected to grow at a CAGR of 8.9%, which compares favourably to the world average (4.9%) and with other major economies, including China (6.5%), UK (4.6%), Japan (0.4%), Germany (2.1%) and the USA (4.1%) for the similar period of CY 22 to CY 27. It is also expected that the growth trajectory of Indian economy will enable India to be among the top 3 global economies by FY 28. Several factors are likely to contribute to economic growth in the long run.

## Outlook of the Indian Economy

The Indian economy recovered swiftly from the pandemic, with its real GDP in FY24 being 20 per cent higher than the pre-COVID, FY20 levels. This meant a CAGR of 4.6 per cent from FY20, despite a 5.8 per cent decline in FY21 inflicted by the pandemic. During the decade ending FY20, India grew at an average annual rate of 6.6 per cent, more or less reflecting the long-run growth prospects of the economy. This is the background against which we can see the prospects for FY25.

IMF projects the global economy to grow at 3.2 per cent in 2024, with risks being broadly balanced. The average annual global growth was 3.7 per cent during the decade ending FY20. Inflationary pressures have moderated in most economies with declining global commodity prices and easing of supply chain pressures. However, core inflation remains sticky and driven by high service inflation. Many central banks have hinted at the peaking of the interest rate hike cycle. The ECB has already cut the policy rate, while the Fed has hinted at reducing the rate in 2024. If the services inflation across economies moderates faster, that may allow central banks to bring forward the monetary policy easing cycle earlier than currently anticipated. A likely reduction in policy rates by central banks of AEs, especially the Fed, will open the space for central banks of EMEs to follow the lead, bringing down the cost of capital.

Domestic growth drivers have supported economic growth in FY24 despite uncertain global economic performance. Improved balance sheets will help the private sector cater to strong investment demand. A note of caution is warranted here. Private capital formation after good growth in the last three years may turn slightly more cautious because of fears of cheaper imports from countries that have excess capacity. While merchandise exports are likely to increase with improving growth prospects in AEs, services exports are also likely to witness a further uptick. A normal rainfall forecast by the India Meteorological Department and the satisfactory spread of the southwest monsoon thus far are likely to improve agriculture sector performance and support the revival of rural demand. However, the monsoon season still has some ways to go. Structural reforms such as the GST and the IBC have also matured and are delivering envisaged results.

## AN OVERVIEW AGRI. CHEMICAL INDUSTRY AND ITS VARIOUS SEGMENTS

India is an agrarian country, where more than 50% people are dependent on agriculture for their livelihood and is the largest producer of spices, pulses, milk, tea, cashew and jute & the 2nd largest producer of wheat, rice, fruits and vegetables, sugarcane, cotton and oilseeds. Agricultural inputs, essential for enhancing farm productivity and crop quality, encompass seeds, nutrients, and agrochemicals. High-quality seeds, including hybrid, open pollinated, and genetically modified varieties, form the foundation of successful crop production by offering traits such as higher yield, disease resistance, and better adaptability. Nutrients, divided into macronutrients like nitrogen, phosphorus, and potassium, and micronutrients such as iron and zinc, are crucial for plant growth and development, typically provided through organic or synthetic fertilizers. Agrochemicals, including pesticides, herbicides, fungicides, and plant growth regulators, play a significant role in managing pests, diseases, and weeds, thereby ensuring healthy crop growth. The judicious use of these inputs can significantly boost agricultural productivity, ensure sustainability, and support food security, although challenges such as accessibility, affordability, environmental impact, and regulatory compliance need to be addressed to maximize their benefits and minimize potential risks.

## APPLICATION OF AGROCHEMICALS & FERTILISER

### Flow of Agricultural Inputs

### Seeds

Seed is the fundamental and most critical input for sustainable agriculture. The effectiveness of all other inputs largely depends on the quality of seeds. It is estimated that quality seeds alone contribute directly to about 15- 20% of total production, depending on the crop, and this contribution can be increased up to 45% with efficient management of other inputs. The developments in the seed industry in India, particularly over the last 30 years, have been very significant. The Government of India undertook major restructuring of the seed industry through the National Seed Project Phase-I (1977-78), Phase-II (1978-79), and Phase-III (1990-1991), which strengthened the necessary seed infrastructure. This restructuring marked the first turning point in shaping an organized seed industry. Another significant milestone was the introduction of the New Seed Development Policy (1988-1989), which transformed the seed industry's character. The policy provided Indian farmers with access to the best seeds and planting materials available globally.

## Agro-chemical

Agrochemicals (Crop protection products) are designed to protect crops from insects, diseases and weeds. They do so by controlling pests that infect, consume or damage the crops. Uncontrolled pests significantly reduce the quantity and quality of food production. The Food and Agriculture Organization (FAO) estimates that up to 40% of food crops are lost due to plant pests and diseases annually. Furthermore, food crops must compete with 30,000 species of weeds, 3,000 species of nematodes and 10,000 species of plant-eating insects. Agrochemicals are the last and one of the key inputs in agriculture for crop protection and better yield. Notably, India is in top 5 global producer of agrochemicals.

Agrochemicals are broadly classified as insecticides, herbicides, fungicides, rodenticides etc. depending on the type of pest they control.

### Types of key Agro-Chemicals

Insecticides	Fungicides	Herbicides
• Control insect, pests which reduce crop yields and quality	• Prevent and cures fungal plant diseases	• Prevents or reduces weeds, which hamper crop growth and harvest

### Crop Protection Industry

The different types crop protection chemicals covered in the industry includes:

- ✓ Pesticides

### GLOBAL SCENARIO – CROP PROTECTION CURRENT MARKET SCENARIO

During 2019-2023, the market size of the global crop protection industry grew at a CAGR of 7.7% on account of continuous growth in agricultural activities. After a steady growth till 2022, the industry observed a decline of about 2.4% in 2023 due to factors such as a slowdown in global demand, higher energy prices, and erratic monsoons. However, it is expected to grow by 2.2% y-o-y in 2024. The expansion will be attributed to the continuous upgrading of products and the development of technology and economic developments.

Further, Asia-Pacific (APAC), Europe and North America are the largest markets in terms of value owing to the rising demand for commercial farming and adapting to changes in crop mix. APAC region is well-known for its production of rice, soybeans, wheat, and horticultural crops such as fruits and vegetables, but it also faces issues that affect agricultural productivity due to a variety of weeds targeting staple and commercial crops. As a result, there is tremendous demand for crop protection chemicals. The rising use of pesticides and the adoption of sustainable farming methods in countries across this region are driving the demand for crop protection chemical. Whereas Europe is the second-largest market for crop protection, followed by North America. The robust growth in the USA and Canada is contributing to the increase in the North American region.

### Global Crop Protection Industry - Demand Across Regions

The global crop protection market is expected to grow on account of a substantial increase in the production of food products worldwide. The rising consumption of food grains globally is expected to fuel market expansion. APAC region holds the maximum market share with 41% in consumption followed by Europe at 19%. South America and North America jointly accounted for 35% in 2023.

## AN OVERVIEW OF PESTICIDES' ROLE IN CROP PROTECTION

With regard to application, the fruits and vegetables segment dominates the market with a 28% revenue share, followed by cereals & grains whose share is about 27% as of 2023. The demand for cereals and grains such as wheat, rice, corn, oats, barley, and quinoa are rising, especially in Asia-Pacific, due to the growing population in India and China. Further, the amount of consumption of pulses, cereals, and grains in western region is increasing, attributed to the shifting consumer preferences, changing lifestyles, and adaption to nutritious food. Moreover, the consumption of fruits and vegetables is increasing due to growing health consciousness among individuals. Accordingly, pesticides are being used to maintain good quality and protect the crop from pests. Another category, oilseeds and pulses, which constitute 22% of the total revenue is contributing towards the increase in demand. Such factors are fuelling the demand for crop protection chemicals, playing a pivotal role in the advancement of these applications.

## SEGMENTS AND STRUCTURE OF THE GLOBAL PESTICIDES INDUSTRY

The global pesticide industry is dominated by the herbicides segment followed by the fungicides and insecticides segments. Of the global market size of around USD 69,044 million, herbicides accounts for nearly half of the crop protection industry globally, however it is on the lower side for India which is around 17% of the total consumption.

Apart from the crop market, another segment that has contributed to the global pesticides market includes the non-crop market. This segment had a market size of about USD 11 billion in 2023. These pesticides find their application in homes & gardens, turfs & ornamentals, pest control operations, industrial vegetation management, forestry, public health, and aquatic, among others. They are used for control of weeds, diseases, insects, and other pests. Also, they are used for plant growth regulation.

With the expected increase in the application of these pesticides on account of the benefits offered by them, the crop market is estimated to grow at a faster CAGR compared to that of global non-crop. Accordingly, the global non-crop market is expected to rise at a CAGR of about 4.1%-5% by 2028 and is estimated to reach the level of approximately USD 14 billion.

### Trends in Global Pesticides Industry

During 2019-2023, the global pesticides market has grown at a CAGR of 8.8% from USD 49,231 million in 2019 to USD 69,044 million in 2023. The demand in the market has grown despite the geopolitical tensions and global supply chain issues due to which the prices of raw material prices rose high. However, in 2023, the demand remained subdued as the export restrictions were eased in China leading to increase in supply and also resulted in decline in prices.

## INDIA - CROP PROTECTION DEMAND

The Indian crop protection market is poised for growth due to the growing demand for food products. The demand has grown substantially over the last decade on account of increased agricultural output, growing population, and favourable government initiatives such as Make in India and Aatmanirbhar Bharat Abhiyan. Despite challenges such as a slowdown in global demand, crop failures due to erratic monsoons, high energy costs, geo-political tensions, etc., consumption of nutrients and crop protection chemicals has increased in 2023.

Further, the rising population and depleting arable land are increasing the demand for food grains. The usage of nutrients and crop protection chemicals has increased to produce good quality crops and protect them from damage caused by pests and weeds. Also, environmental factors such as weather and rainfall patterns and warmer temperatures in various regions of the country have led to increased consumption of nutrients and crop protection chemicals and are expected to continue in future.

## India - Agri-input Production by Type

The production of agri-inputs in India increased at a CAGR of 16.4% from 689 thousand tonnes in 2019 to 1,267 thousand tonnes in 2023. Pesticides constituted almost 59% share in overall agri-inputs production and are projected to grow by CAGR 3.6% during the period, 2023-2029. Further, the overall agri-inputs production during the forecast period 2023-2029 is projected to grow with a CAGR of 6.9% on account of rising demand for agricultural use.

### Production of Agri-inputs in India by Type (Thousand tonnes)

Particulars	2019	2021	2023	2025F	2027F	2029F	CAGR 2019-2023	CAGR 2023-2029

The usage of pesticides has been increasing over the years. The demand is driven by the country's agricultural activities. Insecticides, fungicides, and herbicides are generally used for pest control in agriculture. In order to protect the crop from losses due to pests, farmers employ these chemical substances. These improve agricultural productivity and ensure food security in the country. The pesticide market in India, which registered a CAGR of 6.5% during 2019-2023, is projected to record a CAGR of 5.9% over the forecast period, 2023-2029. However, the growth in this segment may be impeded due to soil contamination, environmental concerns, and risks associated with health.

Bio stimulants are another sustainable way to enhance the yield of crops and not affect the environment. There is a rising need for organic farming in India to safeguard adequate food availability while not compromising on the health factor. These are biologically-derived substances applied to soil to improve nutrient uptake ability, and abiotic & biotic stress tolerance. The demand in this segment is expected to increase given the need for organic farming. Bio stimulants are projected to increase by a CAGR of 2.8% and 4.3% in volume and value terms, respectively, during the forecast period, 2023-2029.

## PESTICIDES INDUSTRY IN INDIA

### Evolution of the Pesticides Industry in India

The evolution of pesticides in India was led by the Green Revolution. In 1943, India saw one of the worst food disasters during the Bengal famine. Food shortages have resulted in the death of around 40 lakh people in the eastern part of India. The problem of food shortage in India continued even after independence during different time periods and the frequent food scarcity issue led to the beginning of the Green Revolution in India.

### The Green Revolution

The Green Revolution started around the world in several countries between the 1950s and the late 1960s. This resulted in various research technology transfer initiatives throughout the world, which in turn, focused on increasing agricultural production. The revolution started with Norman Borlaug's genetic testing. A hybrid wheat plant that could withstand diseases and fungi (in addition to high yield) was created by him. He is also known as the father of the Green Revolution.

Around the 1960s the Green Revolution was launched by the Government of India with the support of M.S. Swaminathan, a geneticist, who is now referred to as the father of India's Green Revolution. The revolution started in 1967 and continued till 1978.

The Green Revolution in India resulted in growth in agricultural production, primarily in the states of Haryana, Punjab, and Uttar Pradesh. The main achievement in this revolution was the development of a high-yielding variety of seeds of wheat and rust-resistant strains of wheat.

### Aspects of Green Revolution in India

- High Yielding Varieties (HYV)
- Mechanization of Agriculture
- Use of Chemical Fertilisers and Pesticides
- Irrigation.

The Indian agrochemicals industry can be primarily divided into the following types

**Insecticides**

**Fungicides**

**Herbicides**

### Insecticides

Insecticides enable protection of the crops from insects by either preventing their attack or destroying them. They help in controlling the pest population below a desired threshold level.

**They can be further classified based on their mode of action-**

#### Contact Insecticides

Insects get killed on direct contact with these insecticides and they leave marginal residual activity which affects the environment minimally.

#### Systemic Insecticides

Plant tissues absorb these insecticides and destroy insects when the insects feed on plants. These are generally related to long-term residual activity.

### Fungicides

Fungicides are used to prevent fungi attacks on crops and to tackle crop diseases. Protectants and eradicants are two types of fungicides. Protectants protect or hinder fungal growth and eradicants destroy the diseases on usage. This results in better productivity, contraction in crop blemishes, and increased storage life.

### Herbicides

Herbicides, also known as weedicides, are used to destroy unwanted plants. The unavailability of cheap labour leads to the major usage of herbicides in rice and wheat crops. The demand for herbicides is seasonal as they develop in damp, warm climates, and perishes in cold spells. They are of two types depending on the way of action, selective and non-selective. Selective herbicides destroy specific weeds not harming the desired crop and non-selective herbicides are used for widespread ground clearance to handle weeds pre-crop planting.

**Based on the usage, there are three types of herbicides:**

- Application prior to sowing of the crop (pre-planting)
- Application post-development of weeds (pre-emergence)
- Application right away subsequent to sowing (post-emergence)

### Bio-Pesticides

These are the new-age chemicals produced from substances of nature like plants, animal waste, bacteria, and minerals. Bio-pesticides have a small share in the agrochemicals market in India, which is expected to grow, backed by government support and increased awareness about pesticides that are eco-friendly. These pesticides are environment-friendly and easy to use.

This others segment comprises fumigants, bio stimulants, nematicides, rodenticides, and plant growth regulators (PGR). Plant growth regulators are chemicals used to modify and enhance plant growth such as increasing branching, suppressing shoot growth, increasing return bloom, removing excess fruit, or altering fruit maturity. Various factors such as how well the chemical is absorbed by the plant, tree vigour, and age, dose, timing, and weather conditions before, during, and after application affect the PGR performance. They prevent crops from attacking pests at the time of crop storage.

### Current Trend in Bio-Pesticides Industry in India

The area available for agriculture largely is the same, catering to the growing population and rising demand. There was a dire need over the years to improve the crop yield and increase efficiency. Consequently, from 2019 to 2023, the area under cultivation has increased at a CAGR of 10%. Whereas the area under cultivation using biopesticides has increased at a faster CAGR of 21.7% during the same period. The usage of bio-pesticides has increased significantly on account of the various advantages it holds for the soil as well as crop yield

During 2022-23, the production of pesticides declined by 13.3% y-o-y to 258 thousand tonnes. The demand for pesticides from agriculture was also subdued globally and domestically, which is believed to be the reason for degrowth.

## Production Capacity of Pesticides in India

The pesticide production capacity in India meets the domestic and export requirements of the nation. Over the years, the production capacity in India has increased at a CAGR of 4.0%. It has increased from 325 thousand tonnes in 2017-18 to 380 thousand tonnes in 2021-22.

It can be seen that the pesticide production capacity has grown in each of the years for the period 2018-2022 except for 2018-19, where the capacity declined by a marginal 0.3% to 324 thousand tonnes. It is important to note that the industry's capacity utilisation on average has been around 65% in these last five years.

## TRADE SCENARIO OF PESTICIDES IN INDIA

**Trend in Pesticides Exports by India:** India is a net exporter of pesticides and the outbound shipments account for a significant share of the total market size of the Indian agrochemicals industry. Exports of pesticides (technical and formulations both) grew at a CAGR of 8.1% from 461 thousand tonnes in 2018-19 to 630 thousand tonnes in 2022-23. It is to be noted that export CAGR increased at a faster pace compared to that of production, which grew at a CAGR of 4.5%.

**Segment-Wise Import Volume:** Of all the pesticides segment imported by India, herbicides accounted for 19.8% followed by insecticides and fungicides with a share of 12.8% and 9.7%, respectively, on an average during 2018-19 to 2022-23. In terms of CAGR, while herbicides and fungicides grew in the range of around 10%-20%, the quantity of insecticides imported decreased at a CAGR of 1.5% during 2018-19 to 2022-23.

**Segment-Wise Pesticides Import Volume ('000 Tonnes):** Apart from this, imports also include fumigants, plant growth regulators, and miscellaneous (where miscellaneous includes disinfectants, paper impregnated, repellent for insects, weedicides, weed killing agents, etc.) covered under the other segment. The component others accounted for the remaining share of 57.6% on an average during the period 2018-19 to 2022-23. It largely remained flat at 66 thousand tonnes in FY23 vs 69 thousand tonnes in FY19.

## REVIEW OF PESTICIDE USAGE DYNAMICS IN INDIA

### Trend in Chemical Pesticides Consumption

The domestic consumption of chemical pesticides declined at a CAGR of 3.2% from 60 thousand tonnes in 2018- 19 to 52 thousand tonnes in 2022-23. This was due to the impact of new-age agrochemicals where the active ingredient or formulation was at a lower dosage per acre.

### THREATS AND CHALLENGES

**Distribution Systems:** The weak distribution system hinders the reach of agrochemicals to each and every remote area of the country. This, in turn, restricts its availability to the users that are spread at the remotest location in India. The industry requires efficient distribution through retailers to enhance its availability.

**Spurious Products:** The unavailability of pesticides at different locations gives an opportunity for spurious products to make their way. The usage of these counterfeit products, in turn, may also affect the crops, thus harming the honour of the agrochemicals industry and its sales. Besides, the unawareness among farmers contributes towards the growth of such products.

**Need of awareness:** More awareness among farmers with respect to the optimum and proper application of pesticides need to be grown. The companies, however, have been working toward increasing awareness about the usage of pesticides by farmers. They are educating the farmers about the benefits of agrochemicals and their safe usage. This is further expected to increase the demand for pesticides.

**Competition:** The pesticides market is fiercely competitive with several domestic and international players. Companies face challenges on regulatory compliance including obtaining approvals and meeting safety standards. There is an increasing demand for innovation in environmentally friendly products. The companies must also ensure their products are meeting the specific needs of various crops and regions. Additionally, establishing efficient distribution networks is crucial for gaining a competitive edge.

**High entry barriers:** Entry barriers include the high cost, complex regulatory approvals, intricacy of product development and manufacturing, lead time, expenditure required for R&D, building customer confidence and relationships which play a crucial role in shaping the business.

### GROWTH PROSPECT OF INDIAN PESTICIDE INDUSTRY

The overall Indian pesticide industry is estimated to increase at a CAGR of around 8% during the period 2023- 29. on account of an upward growth expected in the international market and a likely increase in domestic usage of pesticides in India.

While the demand for India's pesticides is likely to remain high, India aims to strengthen the process of backward integration for industry. This is because India is dependent on China for some of the technical insecticides, and thus, any disruptions at this source destination (like a chemical plant shutdown in China to reduce pollution) have the potential to affect India's supply chain. While such situations also provide an opportunity for India to increase the exports of pesticides, it does impact the supply chain of the industry. To avoid such instances, the Indian government said that it is considering increasing the scope of the Production Linked Incentive (PLI) scheme to include the domestic manufacturing of agrochemicals. If implemented, the scheme will result in increased competitiveness of domestic producers, and given the reliance on exports, benefits will help India increase its market share in the global agrochemicals markets. The scheme will also help the industry become self-sufficient and will be able to integrate backwards to produce its own technical-grade ingredients instead of relying on China for supplies.

Moreover, many countries across the world are looking forward to a 'China plus one strategy' to avoid excess dependence on China. The adoption of this strategy internationally will benefit India, as the countries that import pesticides from China may now opt for India, which is the 4th largest producer and 13th largest exporter of agrochemicals globally.

While the above-mentioned factors will support the Indian pesticide industry going forward, it is worth mentioning that the Indian pesticide industry remained resilient even during the pandemic year (2021-22) as exports from the Indian pesticide industry increased by a healthy 22% to 648 thousand tonnes and grew by 37.7% to Rs.365 billion on a y-o-y basis.

In addition, India has a competitive edge in terms of low labour costs and has support towards chemical clusters, which will also aid the growth of the agrochemical industry in the coming years.

## KEY GROWTH DRIVERS

### Key Growth Drivers of Crop Protection Industry

**Agriculture:** Agriculture is the primary source of livelihood for about 58% of India's population. As a result, the share of agriculture and allied sectors to the total economy's Gross Value Added (GVA) has been significant and has increased over the years.

As of 2022-23, the sector is the largest employer of workforce and accounted for a sizeable 15.1% in Gross Value Added (GVA) of the country. Growth in allied sectors including livestock, dairying and fisheries has also been the major drivers of overall growth in the sector.

**Government Support:** The government provides aid to the rural economy through various budget announcements that aim at reviving rural areas and raising farmers' income. In addition, growth in credit facilities to farmers through institutional credit mechanisms and low-interest rate farm loans are likely to motivate farmers towards usage of pesticides that help increase the productivity and yields of crops. Besides, the increased minimum support price (MSP) of crops also may contribute to pesticide usage. Moreover, in the recent Union Budget 2022-23, the government promoted the concept of natural and organic farming, thereby encouraging the usage of environment-friendly agrochemicals.

**Growth in Food Demand:** With the expected increase in population, the demand for food grain in India is likely to rise. Accordingly, the growing consumption needs are to be met with almost the same arable land. Thus, raising farm productivity becomes important and this can be done with optimal usage of products like agrochemicals. It is to be noted that per hectare consumption of pesticides in India is one of the lowest in the world.

**Increasing Demand for Horticulture and Floriculture:** Fruits and vegetables have a significant share of around 90% of the Indian horticulture output. With increased consumption of healthy and nutritive foods, the demand for fruits and vegetables is likely to increase. This, in turn, is expected to support higher consumption of fungicides, which helps in contracting post-harvest losses in fruits and vegetables.

**Growing Awareness of Bio-Pesticides:** The rising awareness with respect to the environment-friendly usage of agrochemicals and the use of integrated pest management (IPM) mechanisms are expected to encourage the application of biopesticides. The biopesticides market in India constitutes a small proportion, offering growth opportunities for the segment.

**Off-Patent Molecules:** Any pesticide that goes off-patent provides an opportunity for the Indian industry to develop generic molecules. Such an event thus opens up opportunities for Indian manufacturers to increase their exports. An opportunity amounting to around USD 5 billion is estimated to go off-patent by FY27. This is likely to support pesticide exports from India going forward.

**Export Markets:** The outbound shipments account for a major share of the Indian agrochemicals market and have grown at a CAGR of around 8.1% over the five-year period 2018-19 to 2022-23, thus driving the overall agrochemicals industry. These exports have not just supported the agrochemicals industry but also the overall chemical exports from India as the contribution of pesticides has been significant. To support the ambition of making India a USD 5 trillion economy by 2025, the Indian agrochemical industry is estimated to make outbound shipments of around Rs.385 billion by 2025. This target is also likely to encourage agrochemical/pesticide exports from India.

## KEY GOVERNMENT INITIATIVES

Agriculture being a state subject, the state government is primarily responsible for the growth and development of the agriculture sector developing perspective plans for their respective states and ensuring effective implementation of the programmes/schemes. However, the Government of India supplements the efforts of the State Governments through various schemes/programmes.

### Details of various Government scheme

**Rashtriya Krishi Vikas Yojana (RKVY):** Under the Rashtriya Krishi Vikas Yojana (RKVY) Scheme of the Ministry of Agriculture, grants-in-aid is given to state governments on the basis of the projects approved in State Level Sanctioning Committee Meeting (SLSC). States can take up projects for the development of Agriculture and allied sectors in Public Private Partnership (PPP) for the Integrated Agriculture Component.

**Chemical Promotion Development Scheme (CPDS) :** Chemical Promotion Development Scheme (CPDS) is being implemented since 1997 in the Chemical Division of DCPC under Plan Head of Account. The aim of the Scheme is basically to extend soft support in the form of Grants-in-Aid (General) to various organisations / industry associations, etc.

**Sub-mission On Agriculture Mechanization:** Agricultural machines take an important role to increase productivity with timely and precise fieldwork. To promote the usage of farm mechanization and increase the ratio of farm power to cultivable unit area up to 2.5 kW/ha, the scheme will be implemented in all the Indian states

**Namo Drone Didi:** The Government has approved the Central Sector Scheme ‘Namo Drone Didi’ for providing Drones to the Women Self Help Groups (SHGs) under DAY-NRLM, with an outlay of Rs. 1261 Crores. The scheme aims to provide drones to 14500 selected Women SHGs during the period from 2024-25 to 2025-2026 for providing rental services to farmers for agriculture purpose (application of liquid fertilizers and pesticides for the present). The Department of Agriculture & Farmers’ Welfare has released the Operational Guidelines this scheme and all the stakeholders have been

**Integrated Pest Management Scheme:** Integrated Pest Management Scheme provided by Department of Agriculture and Farmers Welfare, Ministry of Agriculture. The scheme aims at using pest control measures to keep the pest population below economic threshold level (ETL). Salient features of the scheme, such as regular pest surveillance and monitoring to assess pest, disease situation can be obtained. Contact details of concerned officials are also provided.

## KEY MARKET PLAYERS AND THEIR PERFORMANCE IN AGROCHEMICAL SECTOR IN FY2023-24.

## FUTURE OUTLOOK AGRO CHEMICAL (CROP PROTECTION) INDUSTRY

### FINAL WORDS

India's agrochemical industry has experienced remarkable growth in recent years. It has established itself as a key player in the global market. With a strong focus on partnerships and regulatory compliance, India is set to address both domestic agricultural needs and global challenges effectively. The country's increasing income levels and youthful population are driving a consumption-driven economy. This leads to increased demand across various sectors. This situation enables Indian manufacturers to offer competitive pricing for generic agrochemicals. Thus, attracting global attention and driving export volumes. India's reputation for cost-effectiveness and product quality positions it as a preferred destination for agrochemical manufacturing. The "Make in India" initiative by the government has also played a crucial role in advancing the agrochemical industry by promoting domestic manufacturing, reducing regulatory barriers and facilitating infrastructure development. Additionally, initiatives like Aatmanirbhar Bharat Abhiyan highlights the importance of self-reliance and resilience in key sectors like agrochemicals. This aims to reduce dependency on imports and enhance competitiveness. The proposed production-linked incentive system for the agrochemical sector is also expected to further boost domestic manufacturing, create employment opportunities and elevate the country's global competitiveness. India's strict laws and regulations regarding chemical manufacturing, particularly fertilisers and pesticides, have earned global recognition. Mandated by the Insecticides Act of 1968 and The Insecticide Rules of 1971, India implements meticulous checks and balances before releasing pesticides into the market. Overseen by the Central Insecticides Board and Registration Committee, operating under the Industries (Development and Regulation) Act of 1951, ensures adherence to global standards. Such adherence to strict regulations not only ensures the safety of humans and animals but also builds trust among consumers worldwide. This reinforces India's reputation as a reliable source of high-quality agrochemicals.

### **Future of Agro Chemical Export**

India's agrochemical exports are projected to exceed Rs. 80,000 crore (US\$ 9.61 billion) over the next four years, contingent upon a supportive industry environment, according to a report by the Agro Chem Federation of India (ACFI) and EY. The report highlights that agrochemical exports reached Rs. 43,223 crore (US\$ 5.50 billion) in the 2022-23 fiscal year, surpassing domestic consumption. To achieve this growth, the report emphasizes the need for government action, including streamlining licensing processes, enhancing storage and sales infrastructure, incentivizing biopesticide production, and simplifying the registration of new products. ACFI also advocates for trade agreements with countries that have relaxed maximum residue level (MRL) norms and suggests reducing the Goods and Services Tax (GST) on agrochemicals from 18% to 5%.

Despite being the fourth-largest global producer of agrochemicals, India still relies heavily on imports, particularly from China. The report notes that India's agrochemical usage is lower than the global average, with just 400 grams per hectare compared to 2.6 kg per hectare worldwide. The "Make in India" initiative is a crucial opportunity to address these challenges and position India as a global agrochemical manufacturing and export hub.

To cater to this rising demand, we continuously strive to add more and more products to our portfolio based on our own market assessment of demand and supply position of these products. We have obtained registrations for vital molecules for local manufacturing in India and plan to expand our existing formulation facility and to establish a new agrochemical technical manufacturing facility in our existing plant situated at Dahej. This will reduce our dependence on other manufacturers, enhancing profit margins by addressing both domestic and export market requirements for formulated products. The establishment of this technical manufacturing facility will strengthen our ability to produce agrochemicals for the Indian market, complementing our formulation business and supporting our export operations thereby enhancing profit margins. Furthermore, we are concentrating on expanding product registrations internationally as well. Our choice of product portfolio also stems from our commitment to maximizing crop yields, low toxicity, improving plant health, effective pest controls and with minimum chemical residue in food crops

Bio-products, sourced from natural ingredients, provide safer alternatives to traditional chemical products. Our Company is focused on diversifying its portfolio by adding more products in bio-product category. We have secured three registrations for Neem-based bio-insecticides and have applied for registration three bio-fungicides. Our bio-stimulants/plant growth regulators include MAYAMRIT, MAYAGIBB, and MAYASAWAN and our biofertilizer portfolio includes MAYARHIZA. The expansion of bio-products in agriculture is a critical strategy to meet the growing demand for sustainable and eco-friendly agricultural solutions. By focusing on R&D, scaling up production capacity, and raising market awareness, bio-product manufacturers can capture a significant share of this growing market. With this proposed expansion in our existing facility, we will increase the current production capacity of environment friendly products such as Emamectin Benzoate and Spinosad. Further we propose to manufacture bio-pesticides like Spirotetramat and Herbicides like Bispyribac Sodium, Glufosinate Ammonium and Pretilachlor.

### **Pesticide Formulations**

Pesticide formulation involves mixing of Technical with inert ingredients, solvents, carriers and other additives to create a final product that can be effectively and safely applied to control pests. These formulations are environment friendly and designed for practical and easier application of pesticides. The pesticide formulations we manufacture belongs to various categories including Water Dispersible Granule (WDG), Soluble Granules (SG), Emulsifiable Concentrate (EC), Suspension Concentrate (SC), Soluble Liquid (SL), Oil-in-water Emulsion (EW), Capsule Suspension (CS) and ZC formulation.

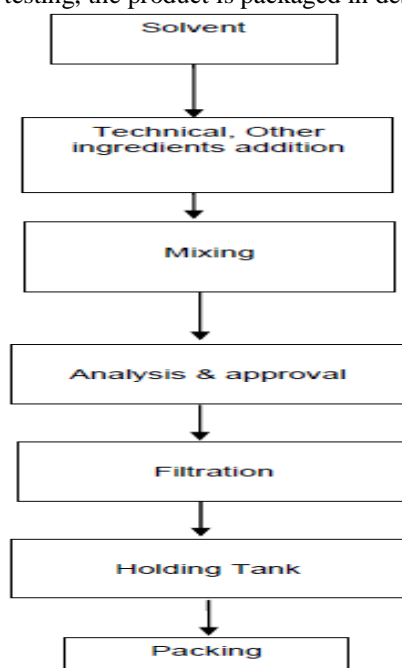

The manufacturing process for these formulations is as follows:

**Water dispersible granules (WDG) / Soluble Granules (SG)** are environmentally friendly products that do not require solvents, making them easy to apply and safe for workers. The manufacturing process occurs in two steps.

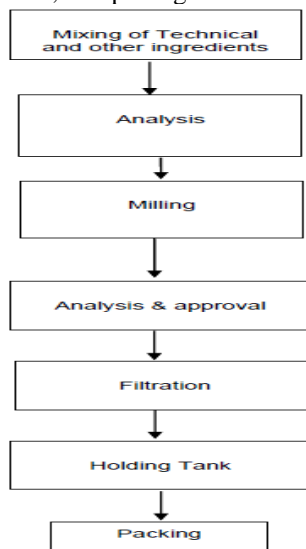

First, jet milling involves blending all the ingredients in specific quantities in a specially designed blender to create a uniform powder. This powder is then processed in a jet mill to enhance its fineness, enabling it to be suitable for field application. The resulting powder is referred to as "wetable powder" (WP), which can be used directly in the field. However, WP can create dust pollution, impacting field workers due to its fine nature. To make it more user-friendly and eco-friendlier, the product undergoes a second step: extruding. In this process, the powder is mixed with a binder to form a uniform mass, which is then fed into an extruder. The extruder converts the mass into small granules, which are subsequently dried and sieved to yield the final product.

**Emulsifiable concentrate (EC)** is a liquid pesticide formulation that includes a solvent to dissolve the active pesticide. When mixed with water, it forms a milky solution that can be uniformly spread during application. In this process, the Active Ingredient is diluted to the required concentration and made emulsifiable with water through the addition of emulsifiers, wetting agents, and fillers. All ingredients are combined in a mixing vessel in the specified order and mixed thoroughly to achieve a clear, uniform solution. Following quality control testing, the product is packaged in designated containers.

**Suspension concentrate (SC)** is another liquid pesticide formulation where the Active Ingredient is dispersed or suspended in an aqueous solution, resulting in a milky white appearance. The Active Ingredient is dispersed in an aqueous medium, which can be water or another liquid. In this process, all specified ingredients are mixed in a vessel under agitation. After thorough mixing, the particle size of the product is controlled using specialized equipment and processes like bead milling or homogenizing. Once the product meets specifications, it is packaged accordingly.

**Soluble liquid (SL)** is a liquid pesticide formulation in which the Active Ingredients dissolve in water to create a clear solution. All specified ingredients are added to a mixing vessel in the designated manner and thoroughly mixed to achieve a uniform product, which is then packaged as requested.

**Oil-in-water emulsion (EW)** is a pesticide liquid formulation containing a lower solvent concentration than emulsifiable concentrates. All ingredients are added to a mixing vessel in specified quantities and combined in accordance with the recipe. The appropriate amount of emulsifier is included to ensure the Active Ingredient is adequately dissolved in the solution. Following proper mixing, the product is packaged after passing quality assurance checks.

**Capsule suspensions (CS)** are water-based slow-release formulations with the Active Ingredient encapsulated within polymer microcapsules. After application, the pesticide is gradually released from the microcapsules, providing extended control over target pests. The manufacturing process involves three stages: first, aqueous ingredients are mixed and heat-treated per the recipe; second, solvent-based ingredients are combined with the Active Ingredient and heat-treated. Finally, both mixtures are combined to form a uniform formulation, which is packed after quality control approval.

**ZC formulation** represents a new generation of products that are stable on both porous and non-porous surfaces, maintaining stability in treated environments. This formulation has a low odour, is non-staining, and allows for low application rates. It offers a high knockdown effect on challenging pests and provides control lasting up to 90 days after application. A ZC formulation is a stable suspension of fine particles of technical material (similar to suspension concentrates), combined with microcapsules of technical material (akin to capsule suspensions) in an aqueous phase, along with suitable formulants. After gentle agitation, the resulting material should appear homogeneous and be suitable for dilution in water.

#### OUR OPERATIONS

Our Company has established various types of business agreements, including registration supply agreements and registration and distribution agreements with international manufacturer, and marketing agreements with domestic marketer.

#### *Raw Materials*

The key raw materials used in the manufacturing of our major products include Dispertox ACZ SPI, Sodium Bicarbonate, Citric Acid Monohydrate, Lactose Monohydrated (IP Garde), and Propylene Glyco among others. We do not enter into long term agreements/ contracts with any of our raw material suppliers and typically source raw materials from open market on an order-

to-order basis. We however procure our raw materials from our vendors on ongoing basis in order to ensure quality and consistency.

We have adequate storage facilities at our plant for the storage of various kinds of chemicals, raw materials and finished products.

### **Packaging Material**

Packaging plays a crucial role in our business operation as most of our products fall under the category of “hazardous chemicals” and need to be packed appropriately to prevent any pilferage and damage to the products. We ensure our products are packed in materials like aluminium pouches, corrugated box, fibre drum, HDPE bottle, HDPE drum, liner bags, monocarton, box label, leaflet, shrink sleeve bottle, duplex box etc. Our Company purchases the packaging materials from our suppliers on an as-needed basis.

### **Logistics**

Most of our imports and exports are facilitated through the Nhava Sheva Port in Mumbai, where we work with reputable C&F (Clearing and Forwarding) agents to ensure goods clearance. The transportation of materials between Nhava Sheva and our plant is carried out via road transport. Our plant at Dahej is equipped with a bonded warehouse, approved by customs, to store imported products. For domestic, sales are conducted on either an ex-works or FOR (Free on Road) basis, through a network of distributors and dealers, depending on customer requirements.

### **Transportation**

Our Company ensures the safe transportation of our products by supplying MSDS (Material Safety Data Sheets) and Trem cards (Transport Emergency Cards) with the vehicles. Additionally, we ensure that drivers are trained handling in hazardous goods transportation. To further enhance the safety and efficiency of our operations, we implement vehicle tracking system to ensure timely deliveries.

### **Security**

We have installed surveillance cameras which are monitored around the clock by security personnel. The cameras are connected to the Directors and key staff for real-time oversight. The plant is secured 24/7 with security staff patrolling the premises continuously. A wind sock is in place to indicate wind direction, and fire extinguishers of various types are strategically located in compliance with statutory requirements to ensure safety during any emergencies.

### **Technology**

Our company utilizes technology across the production systems to maximize efficiency in the process and ensuring the quality of products. Our dedicated development laboratory is equipped with infrastructure to support our research and development initiatives. We do not have any technology agreements in place but continue using proven technology for manufacturing, which will also be applied to our new projects.

### **Sales model**

At present, we operate exclusively through an offline model, distributing products in via dealers and distributors. However, the Company plans to expand into online sales through various platforms including Amazon and Flipkart, specifically for its plant growth regulators (PGR) and bio-products.

The company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. The Company has leasehold land under the arrangement of finance lease as the ownership will be transferred at the end of lease term.

At the inception of a finance lease, the lessee should recognize the lease as an asset and a liability. Such recognition should be at an amount equal to the fair value of the leased asset at the inception of the lease. However, if the fair value of the leased asset exceeds the present value of the minimum lease payments from the standpoint of the lessee, the amount recorded as an asset and a liability should be the present value of the minimum lease payments from the standpoint of the lessee. In calculating the present value of the minimum lease payments, the discount rate is the interest rate implicit in the lease, if this is practicable to determine; if not, the lessee's incremental borrowing rate should be used.

Lease payments should be apportioned between the finance charge and the reduction of the outstanding liability. The finance charge should be allocated to periods during the lease term to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

### BUSINESS OVERVIEW

Our company specializes in the manufacturing of pesticide formulations and supply bulk formulations catering to both Indian agrochemical companies, as well as multinational corporations (MNCs). We began our journey by focusing on import and registration of vital pesticide molecules (Technical) that were not produced domestically in India. We imported these molecules after lot of product research and worked on registering them with the Central Insecticides Board and Registration Committee (CIBRC) under the Department of Agriculture, Government of India. After successful registration we marketed these molecules both as technical and as value added end use formulations for both domestic manufacturers and MNCs.

The time duration from public Offer closure to listing continued to be six Working Days. For further details, refer to the General Information Document available on the website of the Stock Exchange and the Book Running Lead Manager.

**Phase II:** This phase has become applicable from July 1, 2019. and was to initially continue for a period of three months or floating of five main board public Offers, whichever is later. Further, in the event of a transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.
